

San José State University
Aerospace Engineering Department
AE138: Vector-Based Dynamics for Aerospace Applications
Fall 2018

Instructor:	Prof. J.M. Hunter
Office Location:	Engineering 272F
Email:	jeanine.hunter@sjsu.edu
Office Hours:	MW 10:30 – 11:30am; M 3:15 – 4pm
Class Days/Time:	MW 1:30 – 2:45pm
Prerequisite:	Grade of C or better in Math32
Co-requisite:	AE112

Course Format

Class Website: <https://sjsu.instructure.com> Under the courses tab, select this course.

For issues related to Canvas, please contact the eCampus Help Desk. The Help Desk can give technical support for issues encountered in Canvas Courses. Phone: (408) 924-2337
Submit a help ticket using the following URL: <https://isupport.sjsu.edu/ecampus/ContentPages/Incident.aspx>.

Online Class: Usually this class will meet in person in Engineering 189. Sometimes, however, the class will meet online, using a WebEx link. In these cases, I will announce the online schedule ahead of time and post the link on Canvas.

Course Description

Vector mechanics of aerospace vehicle center of mass (three degree-of-freedom particle motion). Particle kinematics, reference frames and rotational relative motion. Two degree-of-freedom aerospace vehicle (rigid body) motion, moments/products of inertia. Equations of motion and numerical time histories of the vehicle's center of mass & rigid body motions (attitude dynamics).

Course Goals

1. *To provide a fundamental knowledge of vector dynamics for aerospace applications.*
2. *To establish the basics of reference frame mechanics and relative motion.*
3. *To provide the fundamentals of aerospace vehicle center of mass (particle) kinematics of using Newtonian methods.*
4. *To write center of mass (three-dimensional) equations of motion using vector mechanics.*
5. *To understand the influence of vehicle moments/products of inertia on rigid body rotational motion.*
6. *To develop physical intuition about aerospace vehicle motion by examining the connection between the differential equations (equations of motion) and their time history solution.*

Course Learning Outcomes

1. Combine and solve for vectors using the operations of vector algebra.
2. Find area using vector algebra.
3. Set up aerospace-vehicle-fixed basis vectors and use them to express and solve for cm (particle) position.
4. Set up a direction cosine matrix relating the planar orientation of two reference frames.
5. Express and resolve vectors (position, velocity, acceleration) into reference frames related by direction cosine matrices.
6. Differentiate scalars representing vehicle states; differentiate vectors in arbitrary reference frames.
7. Express vehicle angular velocity/acceleration and relate these concepts to the direction cosine matrix.
8. Solve kinematic (position/velocity/acceleration) problems when multiple reference frames are involved.
9. Express particle and rigid body constraints for rolling and sliding (slipping) situations.
10. Calculate mass center of a system of particles and of a rigid body.
11. Calculate aerospace vehicle model (rigid body) mass moments/products of inertia (mass properties). Intuitively understand the relationship between mass properties and rigid body motion.
12. Write the linear/angular momentum vectors of a dynamic system.
13. Inertially differentiate linear/angular momentum vectors, set them equal to applied forces/moments and thereby write the equations of motion of the system.
14. Write the total kinetic energy and use it to solve for the motion/reaction forces, etc. of a dynamic system.
15. Use MotionGenesis to model the equations of motion of a dynamic system.
16. Pose an end-of-semester dynamics question and carry out a team project which answers the question.

Correlation of AE138 Course Learning Objectives with ABET Outcomes

AE138 CLO	A	B	C	D	E	F	G	H	I
1 - 14	++								x
15	++			x	x				x
16	++			x	x				x

- +: Skill level 1 or 2 in Bloom's Taxonomy
- ++: Skill level 3 or 4 in Bloom's Taxonomy
- +++: Skill level 5 or 6 in Bloom's Taxonomy
- x: Skill addressed but not assessed

Required Text

Mitiguy: Dynamics of Mechanical, Aerospace and Biomechanical Systems, MotionGenesis, Inc.

Course Requirements and Assignments

Homework	10%
Project	25%
Midterm	20%
Best 3 out of 4 Quizzes	20%
Final Exam	25%

No make-up quizzes will be given.

Reading assignments will be posted for most classes and should be completed before coming to class. Homework problems will be assigned every week or two. These homework sets are essential to your understanding. Allow 8 – 10 hours per week for homework. Often we will work problems in groups during the class period, sometimes for credit, sometimes not. As homework is graded and returned to you, I will post the solutions on Canvas and work selected problems on the board. If there is a particular problem that you would like to see worked out, please let me know and I will be sure to make time to do this.

Final Examination

A comprehensive written final exam will be given on Wednesday, December 12, 12:15 – 2:30pm.

Determination of Grades

Grading Scale: 100 – 97% A+; 96.9 – 93% A; 92.9 – 90% A-; 89.9 – 87% B+; 86.9 – 83% B; 82.9 – 80% B-; 79.9 – 75% C+; 74.9 – 70% C; 69.9 – 67% C-; 66.9 – 63% D+; 62.9 – 60% D; 59.9 – 55% D-; < 54.9% F. All exams must be taken to receive a passing grade.

Homework & project assignments are due at the beginning of the class period.

Course Schedule

Lecture	Lecture Outline
1	Class Overview
2	Vector dynamics review
3	Position vectors and vector geometry
4	Vector basis
5&6	Direction cosine matrices
7	Vector differentiation and integration
8&9	Angular velocity & angular acceleration
10&11	Points: Velocity and acceleration
12&13	Constraints
14&15	Particles
16	Mass, center of mass, centroid
17&18	Moments / Products of inertia
19&20	Inertia properties
21	Rigid Bodies, force and momentum
22&23	Force, impulse and resultant
24&25	Moments and torque
26&27	Equations of motion
28	Final exam review

University Policies

Dropping and Adding Students are responsible for understanding the policies and procedures about add/drop, grade forgiveness, etc. Refer to the current semester's [Catalog Policies](http://info.sjsu.edu/static/catalog/policies.html) section at <http://info.sjsu.edu/static/catalog/policies.html>. Add/drop deadlines can be found on the [current academic calendar](http://www.sjsu.edu/academic_programs/calendars/academic_calendar/) web page located at http://www.sjsu.edu/academic_programs/calendars/academic_calendar/. The [Late Drop Policy](http://www.sjsu.edu/aars/policies/latedrops/policy/) is available at <http://www.sjsu.edu/aars/policies/latedrops/policy/>. Students should be aware of the current deadlines and penalties for dropping classes. Information about the latest changes and news is available at the [Advising Hub](http://www.sjsu.edu/advising/) at <http://www.sjsu.edu/advising/>.

Academic Integrity Your commitment as a student to learning is evidenced by your enrollment at San Jose State University. The [University's Academic Integrity policy](http://www.sjsu.edu/senate/S07-2.htm), located at <http://www.sjsu.edu/senate/S07-2.htm>, requires you to be honest in all your academic course work. Faculty members are required to report all infractions to the office of Student Conduct and Ethical Development. The [Student Conduct and Ethical Development website](http://www.sa.sjsu.edu/judicial_affairs/index.html) is available at http://www.sa.sjsu.edu/judicial_affairs/index.html.

Instances of academic dishonesty will not be tolerated. Cheating on exams or plagiarism (presenting the work of another as your own, or the use of another person's ideas without giving proper credit) will result in a *failing grade for the course* and sanctions by the University. For this class, all assignments are to be completed by the individual student unless otherwise specified. If you would like to include your assignment or any material you

have submitted, or plan to submit for another class, please note that SJSU's Academic Policy S07-2 requires approval of instructors.

Campus Policy in Compliance with the American Disabilities Act If you need course adaptations or accommodations because of a disability, or if you need to make special arrangements in case the building must be evacuated, please make an appointment with me as soon as possible, or see me during office hours. Presidential Directive 97-03 requires that students with disabilities requesting accommodations must register with the [Disability Resource Center](http://www.drc.sjsu.edu/) (DRC) at <http://www.drc.sjsu.edu/> to establish a record of their disability.

Time Required Success in this course is based on the expectation that students will spend, for each unit of credit, a minimum of forty-five hours over the length of the course (normally 3 hours per unit per week with 1 of the hours used for lecture) for instruction or preparation/ studying or course related activities including but not limited to internships, labs, clinical practica. Other course structures will have equivalent workload expectations as described in the syllabus.
