Contact Information
Instructor: Dr. Marco Meniketti
Office Location: 465 Clark Hall
Telephone: 408) 924-5787
Email: Marco.Meniketti@sjsu.edu
Office Hours: Tuesday 10:30-1:30
Class Days/Time: Mon/Wed 9:00-10:15
Classroom: 204 Clark Hall
Prerequisites: Completion of 100W
GE/SJSU Studies Category: This course satisfies Area R of SJSU Studies, Earth and Environment.

Faculty Web Page and MYSJSU Messaging (Optional)
Course materials such as syllabus, handouts, notes, assignment instructions, etc. can be found on the Canvas webpages for the course. Students are responsible for regularly checking with the messaging system through Canvas (or other communication system as indicated by the instructor) to learn any updates.

Course Description
This upper division course explores the panorama of human development beginning with Neanderthal interactions with pre-modern humans, through the evolution of civilization in the early Neolithic. We will investigate the evidence for social development, invention of agriculture, and the emergence of complex states. Many of the latest discoveries, theories, and controversies surrounding human origins, the peopling of the world, and various civilizations will be discussed. This course is as much about the practice of archaeology, its practitioners, and the political ramifications of research as it is about findings in the field. Archaeology is a lively scientific pursuit and current developments within the field will emphasized. Although current theoretical frameworks and methodologies are integrated into the
course, the chief focus is trained on establishing a broad understanding of human social and cultural development and the context for archaeological interpretation. The course is interdisciplinary in scope and will investigate how archaeologists use various scientific techniques to learn about the past and content will be complemented by critical analysis.

This syllabus provides an overview of the major themes and lecture topics to be encountered during each week of the course. Lectures and readings are intended to be complimentary. The syllabus should be viewed as a map of unexplored terrain, with many interesting places to go, not as a road map to a single destination.

Course Goals and Learning Objectives

GE Learning Outcomes

Upon successful completion of this program, within the particular scientific content of this course, students will be able to:

1. demonstrate an understanding of the methods and limits of scientific investigation;
2. distinguish science from pseudoscience; and
3. apply a scientific approach to answer questions about the earth and environment.

In all CLO the core GE requirements of Information Literacy, Qualitative and Quantitative Reasoning, and Critical Thinking are addressed through particular assignments or parts of assignments.

For students beginning continuous enrollment in Fall 2005 or later, completion of, or co-registration in, a 100W course is required for enrollment in all SJSU Studies courses. Courses used to satisfy Areas R, S, and V must be taken from three separate SJSU departments, or other distinct academic units.

The Upper Division GE writing requirement is satisfied in this course through satisfactory completion of the 3000 word Term Paper.

Course Objectives
Interactions of science, technology and society.

- Knowledge of the evolution of archaeological thought, and the role of key individuals in development of archaeology as a science.

- Broad understanding of human evolutionary history since the emergence of our species and the critical issues and problems of evidence.

- Understanding of the important role archaeology plays in modern nationalism, identity, and political ideology.

Differences between scientific, non-scientific, and pseudo-scientific approaches.

- Critical examination of pseudoscience, frauds, scientific racism, and extraordinary claims made concerning past civilizations and human evolution.

- A close look at genuine archaeological mysteries.

- Scientific methods and philosophy contrasted to non-scientific approaches to the past.

Interaction of humans and the physical world.

- Working knowledge regarding several ancient civilizations that historically have been the focus of archaeology and their interaction with environment.

- Investigations into the impact of human activity and culture on prehistoric and historic environments.

- Critical understanding of the major theories and intellectual frameworks concerning human adaptations, invention of agriculture, and the rise of complex states.

Methodologies of human inquiry.

- Knowledge of scientific methods as applied in archaeology and the techniques used in modern archaeological contexts to generate new knowledge.

- Students will learn of the interdisciplinary nature of modern archaeology and how they may make a contribution to the field.

Applications of science and technology.

- Students will develop critical thinking skills in assessing archaeological evidence.

- Students will become acquainted with professional resource materials relevant to specific topics in archaeology through independent and focused research projects.

- Students will learn research skills applicable across academic disciplines.

Values and limitations of science and scientific inquiry.
• Students will gain practice forming specific testable hypotheses, recognizing research questions, and evaluating cases of research.

• Examination of scientific reasoning and analytical procedures.

**Required Texts/Readings**

**Textbooks**

*Chris Scarre, editor*

Kenneth Feder

(Sixth and seventh editions acceptable).

**Other Readings**

Additional readings for the course will be available in Pdf format at the course Canvas webpage. Students are expected to read these articles to supplement the text on specific topics.

**Library liaison**

Silke Higgins
King Library
silkie.higgins@sjsu.edu
408-808-2118

**Course Requirements and Assignments**

SJSU classes are designed such that in order to be successful, it is expected that students will spend a minimum of forty-five hours for each unit of credit (normally three hours per unit per week), including preparing for class, participating in course activities, completing assignments, and so on.

**Assessments:**

Students should anticipate and schedule a minimum of 4 hours of each week for work outside class. The course writing requirement is minimally 3000 words and will be completed in a variety of writing assignments. There is a significant reading component which should be completed each week. Quizzes will be posted on the Canvas page for the course and can be taken over an extended period with the opportunity to make corrections.

**Exams.** There will be one midterm and a final exam. Each exam addresses material from individual thematic units. Conceptual understanding and application of knowledge is the principal objective of the course and will be targeted by assessment. *Exams are problem and short answer oriented. Objective questions are included to assess core content knowledge.*

**Synthesis papers** are designed to elicit critical thinking relating topics associated with the rise of civilizations and human interaction with environments at a greater level of complexity than from short exam questions. Topics are drawn from the readings and address course themes.

**Semester Research Paper.** Students must compete a term report as a requirement of passing the course. The paper will address a specific topic from the course and must
include proper citation of sources and a correctly constructed academic reference section. References must follow American Antiquity style only. Obviously, you are not expected to write at the level of professionals, but you are expected to adhere to professional practice to improve your repertoire of academic skills. Papers will not be accepted after the scheduled grace period deadline. Students are expected to use library resources in completing their project. Failure to take the final exam or submit a Term Paper will result in a failing grade regardless of other completed work.

Assignments are designed to target information literacy, quantitative and qualitative analysis and critical thinking. The goal of these assessments is to provide students with the broadest range of opportunity to demonstrate mastery and competence based on their personal strengths and to reach as many different interests as feasible within the context and constraints of the course. No extra credit assignments are available.

Scores:
Quizzes 5 x 10pts (50 pts) (16% of grade)
Midterm Exam 50 pts; (16 % of grade)
Final Exam 50 pts (16 % of grade)
Synthesis papers 2 x 25 pts (50 pts) (16 % of grade)
Term Paper 100 pts (33% of grade)
Total 300 points

Grading Policy

“A minimum aggregate GPA of 2.0 SJSU Studies (R, S, & V) shall be required of all students as a graduation requirement.” To see full text, review University Policy S11-3 at http://www.sjsu.edu/senate/docs/S11-3.pdf.

Below are basic guidelines for grading. Additional criteria may apply depending on assignments. Please note that a grade of D is not given. In order to pass the course a student must complete the term paper and final exam, regardless of other work completed.

To earn an A: All assignments must be completed, on time, and demonstrate mastery of conceptual as well as critical content. Assignments will exhibit thoughtful and critical analysis, effort at conceptual synthesis, and originality. Papers will be carefully proofread for grammatical and typographical errors and exhibit exemplary writing appropriate to the discipline. Assignments must be of consistently high quality in terms of content and execution. Examinations will score in the range of 90% and above. Final project complete, original, or free of technical errors.

To earn a B: All assignments must be completed, on time, and demonstrate general comprehension of conceptual as well as critical content. Assignments will exhibit thoughtful analysis and effort should be made at conceptual synthesis. Seminar responsibilities achieved. Papers will be carefully proofed for grammatical and
typographical errors and exhibit very few writing problems. Assignments must be of
good quality in terms of content and conform to standards appropriate to the discipline.
Exams may score in the 80% and above range. Final project completed and original or
innovative.

To earn a C: At least 80% of assignments must be completed, on time, and demonstrate
general understanding of critical content. Knowledge of basic conceptual material should
be demonstrated. Seminar responsibilities achieved. Assignments will exhibit thoughtful
effort with few errors in content. Papers will likely contain grammatical and
typographical errors and exhibit general writing problems. Citation standards incorrect.
Exams may score in the 70% and above range. Final project completed at average level
of competence.

To earn an F: Failure to turn in assignments in a timely manner or to complete and submit
more than 50% of assignments. Basic knowledge of conceptual material and critical
analysis not demonstrated. Assignments exhibiting a lack of careful or thoughtful effort
and major errors evident in content. Papers will likely contain grammatical and
typographical errors along with general writing problems, especially in word usage.
Citation standards incorrect. Exams score below the 60% range. Final project possibly
incomplete or late. Failure to take Final Exam or submit the required term paper will
result in automatic failing grade for the semester regardless of other work.

Grade I: Given only in Special circumstances. Failure to complete and submit better than
60% of assignments owing to extraordinary causes as defined by University policy. Must
complete Final Exam. To make up this grade will require an additional project at the
discretion of the instructor.

Classroom Protocol

All lectures and handout materials including exams and exercises are copyrighted and
may not be distributed without written permission to do so.
- Students will be held to the highest standards of academic integrity and intellectual
  ethics. The chief product in the social sciences is new knowledge and original
  thinking. Plagiarism is intellectually dishonest and a form of theft. It will not be
tolerated and will be dealt with in accordance with university Academic Integrity
  Policy.
- Discussions of controversial topics can become emotional. Such discussion demands
  respect and intellectual honesty toward and between fellow students, instructor, and
  from instructor toward students. Personal attacks on individuals holding non-
  conventional/controversial ideas will not be tolerated.
- Clear criteria for grading will be provided for each assignment format. Feedback to
  students will be immediate and as detailed as manageable. The instructor will make
every reasonable effort to provide timely and constructive feedback to students
  concerning performance throughout the semester, especially with written work.
- Students are encouraged to ask questions before, during, and after class and to take
  full advantage of scheduled office hours or to make appointments.
• Students who hand in research draft papers for pre-assessment will have the opportunity to make revisions and improvements before final grading.

• **Assignments will not be accepted by email or after the last scheduled class or during Finals Week.**

• **Students may not leave the room during the final examination.** This will be a signal to the instructor that the student has completed the exam and it will be collected without further opportunity to continue.

• Participation is a vital element in a social science environment and attendance is foundational to academic success. Students are expected to attend class. Although no formal role will be taken, informal attendance records will be monitored.

• As a courtesy and in respect for fellow students and instructor please turn off your cell phones and other electronics. Text messaging during class is disruptive and not only disrespectful, but insulting. It also prevents you from concentrating on the lecture. If you must, then please leave the room.

• A missed exam may be made-up only if a student provides appropriate documentation for legitimate excused from scheduled exam dates (funeral, medical emergency, family crisis). **Make-up exams will be by scheduled appointment at the convenience of the instructor. Absolutely no makes-up exams for reasons not governed by university policy. If a student has multiple exams scheduled for the same day consideration will only be given if sufficient advance notice has been given. A grace period of one class for late research papers will be allowed, but 25 % or more may be deducted. Late assignments will not be accepted without valid excuse.*  No papers will be accepted after the last day of classes.**

• The instructor reserves the right to adjust the syllabus, exam dates, or course content as deemed necessary to facilitate the highest achievement and performance of the class, or to explore timely topics.

• Students are encouraged to ask questions before, during, and after class and to take full advantage of scheduled office hours or to make appointments.

• Students who hand in research draft papers for pre-assessment will have the opportunity to make revisions and improvements before final grading.

• There will be no extra credit assignments for this course. There is already plenty to do.

• Incomplete (I) can not be given to avoid an F grade (University Policy)
# ANTH160 Reconstructing Lost Civilizations

**Departmental Goals**

Learn about the goals of the anthropology department and how it can benefit your education.  

**Credit Hours**

Success in this course is based on the expectation that students will spend, for each unit of credit, a minimum of forty-five hours over the length of the course (normally 3 hours per unit per week with 1 of the hours used for lecture) for instruction or preparation/studying or course related activities including but not limited to internships, labs, clinical practica. Other course structures will have equivalent workload expectations as described in the syllabus.

**University Policies**

**General Expectations, Rights and Responsibilities of the Student**

As members of the academic community, students accept both the rights and responsibilities incumbent upon all members of the institution. Students are encouraged to familiarize themselves with SJSU’s policies and practices pertaining to the procedures to follow if and when questions or concerns about a class arises. To learn important campus information, view [University Policy S90–5](http://www.sjsu.edu/senate/docs/S90-5.pdf) at [http://www.sjsu.edu/senate/docs/S90-5.pdf](http://www.sjsu.edu/senate/docs/S90-5.pdf) and SJSU current semester’s [Policies and Procedures](http://info.sjsu.edu/static/catalog/policies.html), at [http://info.sjsu.edu/static/catalog/policies.html](http://info.sjsu.edu/static/catalog/policies.html). In general, it is recommended that students begin by seeking clarification or discussing concerns with their instructor. If such conversation is not possible, or if it does not address the issue, it is recommended that the student contact the Department Chair as the next step.
Here are some of the basic university policies that students must follow.

**Dropping and Adding**
Find the procedures and deadlines for adding and dropping classes.

- **Catalog Policies**  [http://info.sjsu.edu/static/catalog/policies.html](http://info.sjsu.edu/static/catalog/policies.html)
