Course Description
Cultural anthropology is the study of how humans adapt to, interpret and affect the world in which they live. This course is designed to provide you with an overview to the discipline, as well as an appreciation of what it has meant to be human in different places at different times. By the end of the class, you should have a sense of the anthropological perspective and its merits. After learning some basic concepts and cross-cultural comparisons, we finish the class by showing the practical applications of this perspective in America and elsewhere. Furthermore, you will be gaining first-hand experience in observing the world as an anthropologist, giving you an experiential and intellectual appreciation of a perspective which can be used to better understand a variety of academic, professional, and community contexts.

The course satisfies requirements for the Human Behavior / D (1) Area in the General Education Core, as well as, departmental and program requirements in anthropology and behavioral science. There are no pre-requisites to this course.

Assignments and Grading Policy

There are two midterm examinations, two ethnographic exercises, a course project and a final exam in this course.

Examinations: The exams will consist of multiple choice, True and False, Fill-in the blank and Short Answer questions based on the lectures and readings.

Ethnographic Exercises: The two out of class exercises are intended to help you understand an ethnographic approach to understanding social phenomena. They will require some work, however, the activities ought to be thought provoking and fun. They might help you decide on your course project.

Course Project: The project is an effort to “do” some anthropology in the real world. It is intended to develop your skills as an observer and interpreter of social life.
