Course Description

This course provides a general introduction to the history of anthropological thought since the late 19th century. The first half of the course focuses on the emergence of cultural and social anthropological approaches in the US and Great Britain as a response to theories of biological determinism. The second half of the course emphasizes the changing meanings of culture, society, and biology in the context of colonialism, the Cold War, corporate globalization, and other contemporary phenomena. We will also examine the diffusion of the culture concept—from American anthropology, across academic disciplines, and out into the general public. By the end of the course you should have a thorough understanding of the development of cultural and social anthropological thought, the most influential theoretical approaches of the 20th century, and the political and economic circumstances under which anthropological ideas emerged.

Course Goals and Student Learning Objectives

1. To learn about different theories of culture and society developed by British, French, US, and other anthropologists from the late 19th century to the present.

2. To understand how historical, political and economic contexts shaped and impacted these theories.
3. To examine the relationship between anthropological theories and methods and the relationship between anthropological theories and practices.
4. To compare and contrast classic ethnographies from the past and the present.
5. To analyze and discuss the relationship of anthropological knowledge and the general public.
6. To conduct library research and prepare an academic term paper.

The goals of the anthropology department include helping students to:

- learn about the culture concept and significant findings in anthropology
- examine interconnections between human culture and biology
- develop awareness of past and present cultures
- understand the multicultural aspects of contemporary society
- make good use of social science data and scholarly literature
- increase knowledge of qualitative and quantitative research methods
- recognize anthropology's relevance in addressing social issues

Classroom Protocol

Laptop computers are not permitted in class unless you have a note from the Disability Resource Center justifying a need. You should write lecture notes by hand, or else make audio recordings of lectures and transcribe them after class meetings. Cell phones must be turned off during class to avoid disruption and out of sight or else the instructor will collect the device from the student until the end of class. Text messaging is strictly prohibited. Any student who allows a cell phone to ring during class, or who texts messages will first be given a formal warning by the instructor. A second infraction of this rule will be promptly reported to the Office of Student Conduct with a recommendation that the student be immediately expelled from the course. During exams and quizzes, any use of cell phones will be considered cheating and reported to the Office of Student Conduct. Students should be aware that according to Title 5 of the California Code of Regulations, "Standards for Student Conduct," grounds for student discipline includes: "Participating in an activity that substantially and materially disrupts the normal operations of the University," {Section

41301(b)(4)} which could include use of unauthorized electronic devices in classroom settings.
