Course Description

SJSU Catalog: Biological and sociocultural facets of human sexuality. Evolution and physiology of sex, reproductive biology/ethics and cross-cultural expression of sexual behavior. Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.

"It is University policy that courses to meet Area R, S, and V of SJSU Studies must be taken from three different departments or distinct academic units. This policy has been suspended beginning fall 2012 until further notice and students are permitted to take two or three R, S, or V courses from the same department. However, we encourage you to continue taking R, S, and V courses from different departments in order to broaden your education."

Supplement: This course will focus on the consideration of human sexuality in a biosocial perspective. We will derive insights from both biological and a cross-cultural approaches, including how sexuality in the U.S. is deeply intertwined with systems of social inequality. Topics will include: a) the social, cultural and historical contexts of the scientific study of sexuality; b) alternative disciplinary and methodological approaches to the study of

sexuality; c) a survey of cross-cultural and intra-American cultural variation in sexual beliefs and practices, including the major religious traditions; d) the anatomy and physiology of human sexual response, conception, development and variants of sexual differentiation from biological and cultural perspectives; e) sexual regulation as social control, including the use of sexuality to "reproduce" systems of social inequality; f) contemporary American movements for sexual-social justice and equality (e.g. gender, sex roles, sexual orientation, reproductive rights); g) commercialization of sex; sexual coercion; sexual health issues, including socially transmitted diseases, as well as cross-cultural variations in the understanding of each of these that result in the existing culturally variable patterns of human sexual and reproductive behavior.

Students satisfactorily completing this course will:

- Understand and be able to provide examples of how sexuality is embedded in and shaped by historical, cultural, and societal influences.
- Understand and be able to provide examples of linkages between sexuality, systems of social inequality, and movements for social justice in the United States and elsewhere.
- Have a fundamental knowledge of sexual anatomy, physiology, and the reproductive system, and be able to contrast biological, cultural, sociological, psychological, developmental, and historical perspectives on human sexuality.
- Be knowledgeable about major contemporary sexuality related health issues and the complex interrelationships between biological, social, historical and cultural factors that affect their prevention and control.
- Develop a cross-cultural perspective on human sexuality and understand and respect cultural variations in how humans deal with sexuality, including the diversity in the United States and in the San Francisco/San Jose area.
- Be familiar with various sexual research methodologies and their strengths and weaknesses; and appreciate the value of systematic, empirical research on sexuality, generally, and for pursuing social justice and equality in the United States.
- Feel more comfortable with the subject of human sexuality, including communicating with others more directly about sexual matters.

Grading Criteria for Written Work other than Exams

- A+ 98> A 94-97 A- 90-93

An "A" demonstrates originality, addresses the tasks effectively, shows effective organization and logical argumentation, uses clear, appropriate and accurate examples and a high level of writing competence and knowledge. Completes the task and consistently does extra work that is self-initiated.

- B+ 88-89 B 84-87 B- 80-83
