Course Description

Introduction to Human Lifecourse In Context

Catalog: Human development and its physiological, psychological and sociocultural contexts. Cross-cultural perspectives on infancy, childhood, adolescence, adulthood and old age. The role of university education in the life span. No prerequisites.

Supplement: In this lower-division lecture course on the human life-cycle, you will study and compare the life stages that all human beings experience. You will also examine your particular life experience as an undergraduate student at San José State University. Since this is an anthropology course, particular emphasis will be placed on viewing the human experience in a holistic way from a cross-cultural perspective, particularly as it relates to your life as a student and your relationship to your peers. We will examine the physiological, psychological, and cultural changes that individuals from various societies experience in their life times. This will include infancy, childhood, adolescence, adulthood, aging, and death. We will investigate these topics in lectures, discussions, readings, films, and through individual and group projects. Emphasis will be placed on proper academic writing and research paper development.
