Customizing the Canvas Course List

This quick guide provides step-by-step instructions on how-to customize the Canvas course list.

1. Scroll over “Courses & Groups.” This will show the courses you are enrolled in.
2. In the “My Courses” column, select View All or Customize.

3. A list of courses will appear. By unselecting the star icon by a course, the course will become hidden from the “My Courses” section. The courses with the highlighted star will appear in the “My Courses” section.

Note: By unselecting a course, you are still enrolled in the course. The course will only be hidden from being viewable.

4. After all changes have been made, you can navigate to the desired course by selecting the corresponding course link.
