WebEx System Requirements

This documentation will provide the systems requirements for PC and Mac users when using WebEx. You can visit the WebEx System Requirement page for more detailed information.

PC System Requirements

The following requirements need to be met in order for faculty to host WebEx meetings:

- Intel Core2 Duo CPU 2.XX GHz or AMD processor. (2 GB of RAM recommended)
- JavaScript and Cookies enabled
- Active X enabled and unblocked for Microsoft Internet Explorer (recommended)
- Java 6.0 or above

Mac System Requirements

The following requirements need to be met in order for faculty to host WebEx meetings:

- Intel processor (512 MB of RAM or more recommended)
- JavaScript and Cookies enabled
- Plug-ins enabled in Safari
- Java 6.0 or above

Recommended Browsers

For Windows, the recommended browsers are the latest version of Chrome, Firefox, and Internet Explorer (v8, v9, v10). For a Mac, the recommended browsers would be the latest version of Chrome, Firefox and Safari.
