When will my WebEx recording be available?

WebEx recordings end up in a queue depending on the end time of the session. The items are processed on a first come, first serve basis. This process could take up to 24 hours to occur. Since you will receive an email when the recording is ready, you do not have to stay on the site and wait for the recording to process.

For more information about recordings, you may view WebEx’s help articles here:
