Teaching with Web Conferencing

This document lists several ways to effectively use web conferencing to enhance the learning experience in an online class.

1. Interactions can take place between the teacher and students in dispersed locations.
2. Students can view recordings if they miss a session or class.
3. Collaboration at a distance can connect students from different locations to broaden the learning experience.
4. Research seminars can be provided by a remote speaker.
5. Online meetings can be held for research groups/collleagues.
6. Teams can collaborate and cooperate together on assignments and projects.
7. Sessions can be recorded and shared with others for instructional and training purposes.
8. One-on-One sessions can be scheduled to get questions answered or receive help with assignments.
9. Teachers can offer virtual office hours for students.
10. Student can give presentations online.
