Course Format
The course relies on lecture and lab materials presented in class and students are strongly encouraged to attend.

Course Description
Emphasizes practical electronics applications and products. DC and AC theory; Ohm’s Law, Kirchhoff’s Laws, Power Laws, network theorems, schematic diagrams, instrumentation and measurement, and functions of discrete components.

Course Objectives
Upon successful completion of this course, students will be able to:

- Develop an understanding and working knowledge of the fundamentals of DC and AC theory and theorems.
- Define current, voltage, and Kirchhoff’s current and voltage laws.
- Use voltage and current to calculate power dissipated by devices in a circuit.
- Use Ohm’s law to determine voltage and current relationship in linear devices.
- Analyze series, parallel, series-parallel, and network circuits.
• Apply the principle of superposition, Thevenin’s equivalent circuits, and Norton’s equivalent circuits.
• Analyze circuits containing independent current and voltage sources.
• Describe the properties of inductors, capacitors and obtain transient responses of circuits containing these elements.
• Identify the amplitude, frequency, and phase of a sinusoidal function.
• Transform sinusoidal current and voltage signals from time domain to frequency domain.
• Use the phasor concept to obtain solution of first and second order transient and steady state circuits.
• Use laboratory tools such as oscilloscopes, multimeters, function generators, and power supplies.
• Assemble a circuit and perform voltage and current measurements.
• Perform a critical evaluation of the differences between analytical solutions and the experimental measurements.

Textbooks

Required lab kit

Every student must have the following items:

Multimeter
Breadboard with jumper wires
Aligator clips
9 volts battery with a battery connector

You could buy the above items from anywhere. However, keep in mind that some purchases from overseas, especially China, takes more than a month. You must have your kit and the multimeter by the end of the first week. This is your investment that you would be using for the rest of your academic years and beyond at our department. You may also want to consider a component case carry box, which is absolutely optional.

Final Examination

The final exam will be comprehensive, covering all material presented in class.

Course Evaluation
The total points earned on all the midterms, quizzes, assignments, lab assignments, project, and final exam will be divided by the total possible points and the resulting percentage will determine the course grade.

**Midterms 20%**  
**Final exam 30%**  
**Quizzes 10%**  
**Homework Assignments 10%**  
**Lab Experiments 20%**  
**Project 10%**

The final grade will be determined according to the following scale on a curve:

- **A+** 97 -100%  
- **B+** 87 - 89%  
- **C+** 77 - 79%  
- **D+** 66 - 69%
- **A** 93 - 96%  
- **B** 83 - 86%  
- **C** 73 - 76%  
- **D** 60 - 65%
- **A-** 90 - 92%  
- **B-** 80 - 82%  
- **C-** 70 - 72%  
- **F** 0 - 59%

I. **Midterms & Quizzes**

There will be one midterm given during mid-semester.

Final Comprehensive Exam will be given during final exam period. No makeup will be allowed. Students are encouraged to build an engineering notebook/formula sheet as the course develops and to include useful items such as the resistor color code, formulas, and wire tables.

There will be several quizzes given during the semester as deemed necessary, one quiz will be dropped. No makeup will be allowed. Beware, attendance is required at the start of lab sessions although students may be excused when the lab work is complete. Quiz topics are listed as follows:

II. **Homework Assignments**

Homework will be assigned during class hours and can be given from textbooks or from class discussions. The assignments for homework will be posted on Canvas as will all class presentations

III. **Lab Experiments**

You are expected to conduct a number of lab experiments which includes analyzing circuit both on breadboard and multisim. It is your responsibility to do a conscious and thorough job in a professional manner.

IV. **Final Exam** : Dec 13th (7.15-9.30am) - Check Registrar’s schedule

---

**Academic Integrity:**
Your own commitment to learning, as evidenced by your enrollment at San Jose State University, and the university’s Academic Integrity Policy requires you to be honest in all your academic course work. Faculty members are required to report all infractions to the Office of Student Conduct and Ethical Development. The policy on academic integrity can be found at http://sa.sjsu.edu/student_conduct.

**Cell phones, text messaging, e-mail and Internet:**

1. As a courtesy to the students and the instructor, all cell phones must be turned off during class and lab sessions.
2. The use of computers/ttech products is restricted to the tasks assigned in class. Calculators will be allowed in class and on all exams. A student’s personal formula sheet may be used and may include anything from the class. Class notes from the instructor will be provided on CANVAS after or at the same time as lectures. It is not anticipated that students in a technical course will attempt/need to use a keyboard during class lecture, however if this changes the instructor will allow provisions for this in class. The presence of computers and or tech products such as smart phones, watches and the like are not allowed during quizzes, midterms or the final exam. The appearance of these items during quizzes or exams will be considered a violation of the school academic integrity program.

3. Students who disrupt the class and do not stop when requested by the instructor will be referred to the SJSU Office of Student Conduct and Ethical Development.
4. Finally, note that test material will be over items presented in class, from instructor hand-outs, and from past exams and homework assignments. Thus, problems from the textbook are fair game but obscure material that is skipped is not.

**Americans with Disabilities Act:**

If you need course adaptations or accommodations because of a disability, or if you need special arrangements in case the building must be evacuated, please make an appointment with me as soon as possible, or see me during office hours. Presidential Directive 97-03 requires that students with disabilities requesting accommodations must register with DRC to establish a record of their disability.
