Opportunities for Graduate Students

As you embark on your graduate studies, it’s important that you continue to build expertise and relevant experience in your field of interest. Below is a list of opportunities that can help you in this process.

Types of Opportunities

Research Grants: Applying for a research grant typically consists of a competitive application process in which your research proposal may be selected for funding. The grants can vary from small award amounts to covering a full year or multi-year research project.

Fellowships: Short-term learning opportunities, that typically last a few months to two years, that are granted to master’s or doctoral students based on academic merit to work in a specific field.

Types of Fieldwork: Fieldwork allows students to gain experience and improve their skills by working in real-life settings, under the supervision of faculty and/or onsite supervisor. There are two types of fieldwork:

• Internships: Relevant experience in your field of interest, can be either part-time or full-time, where your workload and performance will be managed by a supervisor.
• Practicum: On-site, part-time field experience where you get to observe and practice tasks under the supervision of an on-site professional and/or professor.

Industry Experience: Part-time or full-time job in your field of interest that allows you to further develop and/or gain skills relevant to your field.

How to Find Opportunities

Below are some key resources for an academic and non-academic job search.

Academic Job Search:

• Chronicle Vitae: jobs in higher education, career resources, and advice from The Chronicle of Higher Education.
• SJSU Research Foundation: supports faculty through each step in the research proposal process from planning a project, identifying sources of funding, to developing a grant proposal, and submitting proposals to sponsoring agencies.
• Faculty: connect with faculty to learn about potential opportunities in research or academia.
• Think Tank: research institute, center, or organization that conducts interdisciplinary research focused on topics such as politics, economics, technology, etc.
  • U.S. Think Tanks
  • Non-U.S. Think Tanks by Region

Non-Academic Job Search:

• Search for jobs and internships on SJSU Handshake
• Search for opportunities in other countries on GoinGlobal
• Join professional associations/groups to connect with professionals already in the field
  • Search for groups or associations on Linkedin
  • List of Professional Associations & Organizations by Industry (this list does not include all professional associations and organizations)
• Career Interest Area Job Boards:
  • Arts, Communication, and Entertainment
  • Business, Financial Services, and Logistics
  • Education and Public & Human Services
  • Health and Nutrition
  • Science, Technology, Engineering, and Math
• Additional Job Boards:
  • www.indeed.com
  • www.glassdoor.com

For additional support with your job/internship search, email a career counselor to schedule an appointment.
Online Networking

Spend time actively building and updating your online presence to be more successful during your SJSU graduate studies and your professional career. Connect with people on social platforms, join forums and discussions to stay updated on industry trends, and follow companies of interest.

Utilizing LinkedIn

About 80% of recruiters use LinkedIn to evaluate candidates when hiring (Jobvite, 2016). Connect with alumni and professionals in the field, research companies, and identify who in your network is connected to the company.

Building Your Profile

Make your profile standout by showcasing your experience and skills. Here are some tips to develop a strong LinkedIn profile:

- Create a headline and summary to highlight your key skills, experience, and goals.
  
  Here is a sample of a headline and summary for a career in academia:

  **Headline:** Ed.D. Student. Lecturer at San Jose State University.
  **Summary:** I am a dedicated educator with 8+ years of teaching experience. I have worked in a K-5 district that primarily serves culturally diverse students from disadvantaged backgrounds. My research interests lie in finding best practices and strategies to improve educational equity and access to address the needs of underrepresented minorities. I am passionate and committed to improving the learning environment of the students I serve to help bridge the achievement gap.

  Here is a sample of a headline and summary for a career in non-academia:

  **Headline:** Business Operations Analyst, MBA Student
  **Summary:** I am a highly motivated professional with 4+ years of experience in business operations. I have reduced operational costs at small and large sized companies by assessing budgets from different angles and making appropriate recommendations. I would like to apply and further develop my skills in business operations at a multinational corporation.

- Add any research experience, publications, presentations, and grants awarded. If you're in the field of research, having your work published is a great way to further market yourself.
- Post articles, pictures, or updates related to your industry. For example, post a picture of you at a professional event and briefly mention what you learned and enjoyed the most.
- Ask for recommendations from supervisors or colleagues to include on your LinkedIn profile. Having others praise your work and skills adds further credibility to your profile.
- Stay active on LinkedIn and define your goal. Do you want to expand your network by connecting with professionals in the field? Are you searching for a new opportunity? Are you keeping up with industry trends and posting articles? Determine your purpose and what level of activity makes sense.
Making Connections

Connect with alumni and professionals in your industry by sending them a personalized message to invite them to your network and to ask about setting up an informational interview.

Sample of personalized message for a professional in academia:

Dear Dr._____, my name is Sammy Spartan. I'm currently pursuing my Ph.D in ____ and I noticed that your research experience is in ____. I would appreciate the opportunity to connect with you to learn more about your research.

Sample of personalized message for a professional in non-academia:

Dear _____, my name is Sammy Spartan. I'm currently pursuing my MBA at SJSU and noticed you're currently working as a project manager at Cisco. I have a high interest in project management and I would like to connect with you as a fellow Spartan and learn more about your role.

Follow companies and organizations of interest to learn about new initiatives, job opportunities, product launches, and to expand your network by connecting with employees. Join professional organizations, industry groups, and your alumni association(s).

For information on how to build your LinkedIn profile, make connections, and set up an informational interview, please review the LinkedIn section in our Job/Internship Search Guide.

SJSU Handshake

Handshake is the SJSU Career Center’s job and internship database for currently enrolled students. Handshake uses cutting edge technology to help students connect with employers, source jobs and internships, register for employer information sessions, and view upcoming on- and off-campus career-focused events. Employers who post internships and jobs on Handshake are focused on recruiting university students, which is the key reason to create your profile!

Building Your Profile

Get started on SJSU’s job and internship database!

• Log in with your SJSUOne ID and password
• Fill out your career interests completely for customized events, articles, and opportunities.
• Set up and complete your profile to maximize your search efforts and be found by employers who are looking for SJSU talent.
• Utilize the different search filters including job type, industry, job function, and location.
• Upload your resume and any other relevant documents to better market yourself to employers.
• Download the Handshake app for easy access!

Making Connections

Message and connect with graduate students from SJSU and other universities in your field of study with questions on career-related topics such as:

• Professional experience
• Education recommendations
• Resume advice
• Interview advice
• Inside information about a company and/or position
• Q&A or other career-related topics
In-Person Networking
You may already be submitting your resume for opportunities, and your LinkedIn and Handshake profiles are getting viewed by recruiters and employers. However, that’s only part of the process to get an internship or job in a competitive and constantly changing job market. Therefore, your networking needs to go beyond your online presence.

Why Live Networking is Important
1. As many as 70 - 85% of people have ended up in their current position thanks to networking (Payscale, 2017).
2. Referrals are the leading source of candidates for over 80% of employers (Forbes, 2019)
3. Opportunity to gain inside knowledge of the hiring process and work culture
4. Connect to people who are influencers and stay current in your field
5. Networking can positively build and extend your professional reputation

Networking On-Campus
Here are some ways to build your SJSU network:
• Join a student organization
• Attend employer events and other SJSU events
• Ask your college professors and academic advisors for ideas
• Check with your department about other opportunities
• Make an appointment with a career counselor for additional support on networking strategies

Networking Off-Campus
Here are some ways to further develop your network:
• Ask your classmates, friends, colleagues where they network and socialize
• Check social media: LinkedIn, Facebook, Twitter, and Instagram
• Log in to SJSU² Mentoring & Meetups using your SJSU One ID and password. Access Quick Connections, to view profiles of alumni and other industry professional mentors from a diverse range of fields who can help you achieve career success
• Search for events on networking sites such as Meetup.com and Eventbrite.com
• Become an active member of a professional organization in your field of study; consider joining their board and/or committee to get further involved
• Attend conferences in your field; offer to volunteer or be a presenter to gain more visibility and build your network
• Set up informational interviews with SJSU alumni and professionals working at target companies/industries

How to Start a Conversation
Preparing a conversation starter helps you introduce yourself to a new contact or potential employer with confidence. Take time to develop a pitch to highlight your graduate studies, professional experience, career goals, and any relevant activities.

Here is an example of how you would introduce yourself to a STEM employer at an industry event:
“Hi, my name is______. I’m working on my Masters in Electrical Engineering at SJSU, and will graduate in May 20xx. I have 2 years of work experience working for a tech company in India after completing my Bachelor’s in Engineering., and my key technical skills are electrical design and Python. I am an active student member of the Institute of Electrical and Electronics Engineers, and attend Bay Area technical conferences. I’m here to
Here is an example of how you would introduce yourself to a professor to express interest in a teaching position:

Hello Dr.____, My name is ____ and I recently completed my MS in Biological Sciences at SJSU. I have 2 years of experience as a Graduate Teacher Assistant at ____ where I taught sections in the following subjects: microbiology, physiology, and molecular biology. I assisted professors with developing curriculum, lab materials, and facilitating study groups. I am committed to helping students learn by applying different teaching methodologies that will address students’ unique learning styles.

What NOT to do when networking:
There is more to networking than just showing up at a professional event. Here is a list of what not to do when meeting other attendees or employers:

- Ask the question “Are you hiring?” The employer doesn’t know you and this can come off too aggressive. Remember the key is to first build a relationship.
- Take longer than 30 seconds to introduce yourself
- Failing to do research ahead of time on the event (speakers/employers, topics/opportunities, etc.)
- Ask for a business card without an introduction or follow-up
- Discuss religion, politics, personal issues, or other controversial topics
- Dress appropriately to give a good first impression
CV vs. Resume

What is the difference between a CV and a resume?

A curriculum vitae, or CV, is a detailed record of your education, employment history, research experience, certifications, publications, professional affiliations, etc. It is often two or more pages and is used to apply for jobs in academia, research, and the medical fields.

See an example below:

SAMMY S. SPARTAN
San Jose, CA 95008
(888) 888-8888
sammyspartan@gmail.com

EDUCATION:
San Jose State University, San Jose CA
Bachelor of Arts Political Science, 3.85 GPA Spring 2017
Global Politics Concentration, Minor in Economics
Study Abroad, Barcelona, Spain Summer 2016

Interview Preparation

The main goal of the interview process is to not only determine if you meet the qualifications for the position, but also determine if you are a "good fit" for the company or organization. The employer wants to know how well you will perform the duties and tasks required and whether you will be a great addition to the team.

Academic Positions
Interviewing for research and teaching positions can be a challenging process, but it is also an opportunity to share your work and make a strong impression.

Research Positions
Here are a few sample research interview questions:
1. Describe your research. How is your research relevant to this position?
2. How do you see your research impacting the field?
3. If you were to start your research again today, what would you do differently?
4. Describe a research problem you have faced. What did you learn?
5. What experience do you have with attracting funding?

Teaching Positions
Here is a sample of a few common teaching interview questions:
1. Why did you decide to become a teacher?
2. What is your teaching philosophy?
3. Describe your classroom management structure.
4. How would you meet the unique educational needs of your students?
5. What interests you about our campus?

Non-Academic Positions
Below is a list of general, common interview questions.
6. Tell me about yourself.
7. Why do you want to work here?
8. Why should we hire you?
9. What is your greatest strength?
10. What is your greatest weakness?

For a list of more questions and tips on how to prepare for an interview, review our interviewing guide.
