

San José State University
Department of Chemistry
Chem 131B, Biochemistry Lab, Fall 2019

Course and Contact Information

Instructor:	Dr. Ningkun Wang
Office Location:	DH 607
Telephone:	(408) 924-4955
Email:	ningkun.wang@sjsu.edu (preferred method of contact)
Office Hours:	Mon and Wed 1:30 PM– 2:30 PM, and by appointment
Class Days/Time:	W 2:30 pm – 5:20 pm, F 1:30 pm – 5:20 pm
Classroom:	DH 609
Prerequisites:	CHEM 100W, CHEM 130A, CHEM 131A (with grades of “C” or better; “C-” <u>not accepted</u>)
Co-requisite:	CHEM 130B or CHEM 130C

Canvas Web Page

Course materials such as syllabus, handouts, notes, assignment instructions, etc. can be found on the Canvas learning management system course website (**CANVAS** at <http://www.sjsu.edu/at/ec/canvas/>). *You are responsible for regularly checking with the messaging system through Canvas to learn of any updates.*

Course Description

A capstone course on advanced isolation techniques and enzyme methodology. Chem 131B is the second semester of a two semester biochemistry laboratory course. The laboratory work is associated with intermediate qualitative and quantitative techniques in modern biochemistry. A capstone experience requires students to integrate principles, theories, and methods learned in previous courses throughout the major. Students will be working on research projects that will allow analysis, synthesis, and evaluation of learned knowledge and will communicate the results of the projects effectively in a professional manner.

Learning Outcomes

Chem 131B addresses the following Program Learning Objectives:

1. PLO (5): Demonstrate understanding of core concepts and to effectively solve problems in biochemistry.
2. PLO (6): Answer questions regarding safe practices in the laboratory and chemical safety.
3. PLO (7): Demonstrate safe laboratory skills (including proper handling of materials and chemical

waste) for particular laboratory experiments.

4. PLO (9): Effectively present a scientific paper orally, as per at an American Chemical Society symposium.
5. PLO (10): Write a formal scientific laboratory report, using the format and style of an article in a peer-reviewed American Chemical Society journal.

GE Learning Outcomes (GELO)

GE Area R (Earth and Environment) Goal

Students will cultivate knowledge of the scientific study of the physical universe or its life forms.
Students will understand and appreciate the interrelationship of science and human beings to each other.

Upon successful completion of this course, students will be able to:

1. Area R GELO (1): Demonstrate an understanding of the methods and limits of a scientific investigation.
2. Area R GELO (2): Apply a scientific approach to answer questions about the earth and the environment.

This course fulfills the GE writing requirement as follows:

Summary of Required Writing

Total writing will include a minimum of 3000 words:

1. In class writing will include maintaining an accurate and up-to-date laboratory notebook.
2. Rough draft of sections for the final lab report.
3. Final draft of lab report.

“A minimum aggregate GPA of 2.0 SJSU Studies (R, S & V) shall be required of all students as a graduation requirement.” To see full text, review [University Policy S11-3](http://www.sjsu.edu/senate/docs/S11-3.pdf) at <http://www.sjsu.edu/senate/docs/S11-3.pdf>.

Course Learning Outcomes (CLO)

Upon successful completion of this course, students will be able to:

1. CLO (1): Apply proper laboratory practices including safety, waste management, and record keeping.
2. CLO (2): Use and understand modern biochemical techniques and instruments.
3. CLO (3): Plan, design, and execute experiments based on biochemical literature.
4. CLO (4): Interpret experimental results and draw reasonable conclusions.
5. CLO (5): Communicate effectively through written and oral reports.

Required Texts/Readings

Textbook

No textbook is required for the course.

Other Readings

Alberts et al., *Molecular Biology of the Cell*, 4th Ed. (*optional*)

This is a good source for background information on molecular biology concepts. It can be accessed for *free* on [Pubmed](http://www.ncbi.nlm.nih.gov/books/NBK21054/) at <http://www.ncbi.nlm.nih.gov/books/NBK21054/>.

Occasionally, papers from the literature will be suggested for additional information on certain topics covered.

Other equipment/material

Research laboratory notebooks will be kept online using Google Docs (ensure the lab instructor and TA's have access on the first week of class); scientific calculator (equivalent to Ti 30) capable of performing linear regression analysis. No graphing calculators, unless memory is cleared by the instructor.

Library Liaison Yen Tran (yen.tran@sjsu.edu)

Course Requirements and Assignments

“Success in this course is based on the expectation that students will spend, for each unit of credit, a minimum of 45 hours over the length of the course (normally 3 hours per unit per week with 1 of the hours used for lecture) for instruction or preparation/studying or course related activities including but not limited to internships, labs, clinical practica. Other course structures will have equivalent workload expectations as described in the syllabus.” More details about student workload can be found in [University Policy S12-3](http://www.sjsu.edu/senate/docs/S12-3.pdf) at <http://www.sjsu.edu/senate/docs/S12-3.pdf>.

Assignments The course will consist of the following:

Assignments	Points
Midterm Exam (Oct. 4th) (GELO 1, 2; CLO 2, 4; PLO 5)	100
Final Lab Report (Due Dec 13) (GE writing requirement; CLO 1-4; PLO 5, 8)	100
Assignments (GELO 1, 2; CLO 1-3; PLO 5-7)	100
Notebook and Instructor Evaluation (GE writing requirement; CLO 1-4; PLO 7)	70
Journal Article and Research Presentations (GELO 1, 2; CLO 4-5; PLO 5, 8)	80
Quizzes (GELO 1, 2; CLO 2, 4; PLO 5)	50
Total	500

Instructor Evaluation

The instructor evaluation is based on technique, performance, lab organization, lab work, comprehension of experiments, safety, attitude, proper use and disposal of chemicals, preparation prior to class, following directions, lab/lecture involvement, group dynamic, and participation, etc.

Exams and Quizzes

A midterm and 6 quizzes will be given in the semester. The midterm will be given during one of the scheduled lab periods. The date is given on the attached schedule. The quizzes will be given throughout the semester during scheduled lab periods also noted on the schedule. The lowest scored quiz will be dropped from your final grade. Exams and quizzes will cover theory, experimental protocol and data analysis. The content will be a combination of objective, calculations, short answer, short essay questions, and multiple-choice. Calculators (non-graphing, no memory) are permitted during exams and all exams are closed book. The final exam is comprehensive and will cover material presented/given throughout the semester.

Laboratory Notebook

It is imperative that all experimental data are recorded in the laboratory notebook and that this information is kept up-to-date. Never depend on your memory to record such data; you will forget it if it is not written down. Notebook entries should be clear and concise. Entries should be neat enough and annotated so that the experimental notes and data can be read and understood by others. Your notebook will be graded on these criteria.

It is important to note that in professional settings, the notebook is the primary document verifying your intellectual property. Establishing good notebook habits now will prepare you for your career.

You will use Google docs to maintain the Laboratory Notebook. Ensure that NB pages are up to date and completed by the end of each laboratory period. ***Since notebooks will be kept as a Google doc, the instructor will be checking notebooks periodically, sometimes without notice. The students will be reminded in class every day to ensure that these notebooks are kept up to date.*** Feedback will be given to ensure the correct information and materials are found in the NB.

Laboratory (Research) Report

A report of all laboratory work will be required in the form of a scientific journal article, specifically based on the ACS Biochemistry journal. This is to be completed outside of the lab period (with some class time dedicated to help with this). The required content and format will be explained in class with appropriate PDF files posted on Canvas. ***Although the experiments may be performed in groups, all interpretations must be your own.*** Details regarding the format of the paper (final lab report) will be available on [Canvas](#) and discussed periodically. ***The final report is limited to an overall 3,000-word minimum, not including figures and tables.***

Oral Presentations

Two oral presentations are required. One presentation is a “lab-talk” covering background and work done towards the laboratory project (will be presented near the end of the semester). The other presentation is a “journal article” presentation. ***The instructor must approve the journal article and the approved journal article must be emailed to the instructor at least two weeks in advance of the presentation.*** The selected article should be a recent primary article (published within the last 5 years) and closely related to the laboratory project. The required content and format will be explained in class and posted on [Canvas](#).

[University Policy F69-24](#) at <http://www.sjsu.edu/senate/docs/F69-24.pdf> states, “Students should attend all meetings of their classes, not only because they are responsible for material discussed therein, but because

active participation is frequently essential to insure maximum benefit for all members of the class. Attendance per se shall not be used as a criterion for grading.”

Grading Information

Points will be distributed as described above. I reserve the right to scale exam grades. If scaled, scores will never be scaled down from your raw score. Generally, the average score on an exam will be scaled to the C+/B-range, though I reserve the right to adjust this in either direction if, in my estimation, the class overall performed differently than a “typical” class. The course grade will be determined from the resulting average of the point total as follows:

<u>Percent Average</u>	<u>Final Course Grade</u>
97-100	A+
94-96	A
90-93	A-
87-89	B+
84-86	B
80-83	B-
77-79	C+
74-76	C
70-73	C-
67-69	D+
64-66	D
60-63	D-
< 60	F

Missed Exams and Quizzes

If an exam or quiz is missed without a legitimate excuse a scaled score of 0 will be entered for that exam or quiz. If an acceptable excuse is provided then the exam grade will be prorated. ***In no case will a make-up exam or quiz be given.***

Exam Re-grades

The student has 7 calendar days from the date they have received the exam to bring to my attention any perceived errors in grading. However, in doing so, I have every right to review the entire exam, re-grade and adjust the grade accordingly, whether it is to your advantage or disadvantage. ***Only one re-grade per exam is allowed and the score given on the re-grade is FINAL! Important to note that no re-grade will be accepted or considered after the 7-day period.***

To request a re-grade, the student should:

1. On a separate sheet paper, note the question(s) or problem(s) that the student wants to the instructor to review (keeping in mind that I have the right to review the entire exam).
2. Include your justification for the re-grade (what do you think is the problem with the way the question or problem was graded?) Include any supporting information such as a page from the lecture, slides, or textbook, etc...
3. Submit all of the necessary information to the instructor 7 days from the date the exam was received.

It is important to note: Re-grade requests based on another student’s graded exam (for example, “Another

student answered the same question the same way I did and received more points”) will require that both exams be submitted for a re-grade so that both may be adjusted, if necessary. Errors in adding scores is not considered a re-grade, so submitting an exam for this type will not be checked otherwise. Be aware that students who submit frivolous re-grade requests may become ineligible to receive future letters of recommendation from me.

Late Assignments, Extra Credit, and Misc. Information

The student assignments are due at the beginning of the laboratory period, unless otherwise stated. Assignments submitted on the due date but later than the beginning of class are considered late and subject to 5% point reduction (and subsequent 5% point reductions for each further day late).

There is **NO extra credit or extra assignments** during or after the semester is over, **so please don't ask.**

“Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), and completion of Core General Education are prerequisite to all SJSU Studies courses. Completion of, or co-registration in, 100W is strongly recommended. A minimum aggregate GPA of 2.0 in GE Areas R, S, & V shall be required of all students.”

Note “All students have the right, within a reasonable time, to know their academic scores, to review their grade-dependent work, and to be provided with explanations for the determination of their course grades.” See [University policy F13-1](http://www.sjsu.edu/senate/docs/F13-1.pdf) at <http://www.sjsu.edu/senate/docs/F13-1.pdf> for more details.

Classroom Protocol

Students are expected to arrive on time and attend all classes. Students should be courteous and professional to other students, the instructor, teaching assistants, and guest instructors. **NO FOOD OR DRINKS ALLOWED IN THE LABORATORY AND APPROPRIATE ATTIRE WORN!** No open toed shoes or tank tops, long hair should be pulled back.

We hope that the classroom and laboratory will serve as an environment that will promote learning and the development of new ideas, as well as be a safe and respectful community. ***Behavior that interferes with the normal academic function in a classroom or lab is unacceptable. Students exhibiting this behavior will be asked to leave the class.*** Examples of such behavior include:

- a) Persistent interruptions or using disrespectful adjectives in response to the comments of others.
- b) The use of obscene or profane language.
- c) Yelling at classmates and/or faculty.
- d) Persistent and disruptive late arrival to or early departure from class without permission.
- e) Physical threats, harassing behavior, or personal insults (even when stated in a joking manner).
- f) Use of personal electronic devices such as laptops, cell phones, tablets in class, unless it is part of the instructional activity.

The university has a brochure on student conduct that you can view at http://www.sjsu.edu/studentconduct/docs/ENGLISH_Brochure.pdf.

Laboratory Safety

You should read the safety section of the SJSU Catalog under the Chemistry Department. Note in particular: “Failure to comply with proper procedures and prescribed safety cautions shall subject the student to disciplinary action. 1) Any student who engages in unauthorized experimentation or who seriously disregards

safety, thereby endangering self or others shall be withdrawn immediately from the class with a grade of F. 2) Any student who shows persistent disregard for safety may have his/her grade lowered, and may risk being withdrawn with a final grade of F.”

NOTE: A safety quiz will be given during the second day of class and must be passed with a grade of 80% or better. The quiz will be based on the [SJSU Chemistry Department Safety Rules](http://www.sjsu.edu/chemistry/Documents/Safety%20Sheet%20for%20Teaching%20Laboratories_012017.pdf) found at: http://www.sjsu.edu/chemistry/Documents/Safety%20Sheet%20for%20Teaching%20Laboratories_012017.pdf.

University Policies

Per University Policy S16-9, university-wide policy information relevant to all courses, such as academic integrity, accommodations, etc. will be available on Office of Graduate and Undergraduate Programs' [Syllabus Information web page](http://www.sjsu.edu/gup/syllabusinfo/) at <http://www.sjsu.edu/gup/syllabusinfo/>.

Chem 131B, Biochemistry Lab, Fall 2019, Course Schedule

The schedule is subject to change. Changes will be noted in class or posted on Canvas.

Course Schedule

Week	Date	Topics, Readings, Assignments, Deadlines
1	Aug. 21	Intro to lab– <i>Check in</i>
1	Aug. 23	Safety quiz. Circular Dichroism. Designing mutation site. (Computer Lab)
2	Aug. 28	Bacterial expression vectors and protein solubility. Pour agar plates.
2	Aug. 30	<i>Quiz 1</i> Benchling tutorial. Transformation of vector – <i>Google Doc Access due</i>
3	Sep. 4	Intro to PCR & PCR mechanism of action, primer design for Site-Directed Mutagenesis (Computer Lab) – <i>Journal Articles for Presentations Due</i>
3	Sep. 6	Vector DNA extraction (Mini-Prep), NanoDrop, DNA electrophoresis – <i>Primer Design Report Due on Sep 8th</i>
4	Sep. 11	<i>Quiz 2</i> PCR and Dpn1 digestion
4	Sep. 13	Intro to DNA sequence analysis. Transformation of PCR product
5	Sep. 18	Plasmid DNA extraction, NanoDrop and preparation for DNA sequencing
5	Sep. 20	DNA sequence analysis (Computer Lab)
6	Sep. 25	<i>Journal Article Presentations – Rd #1</i>
6	Sep. 27	<i>Journal Article Presentations – Rd #2</i>
7	Oct. 2	<i>Quiz 3</i> Recombinant bacterial expression intro, transformation into BL21(DE3) Cells
7	Oct. 4	<i>Midterm Exam (2 hrs)</i>
8	Oct. 9	Bacterial growth expression experiment at 37°C/16°C (LB/TB)
8	Oct. 11	Protein solubility test, SDS-PAGE analysis

Week	Date	Topics, Readings, Assignments, Deadlines
9	Oct. 16	Protein solubility test, SDS-PAGE analysis (His-stain) – <i>Intro Draft Due</i>
9	Oct. 18	<i>Quiz 4</i> Protein purification intro. Transformation into BL21(DE3) for large scale expression; media preparation
10	Oct. 23	Large scale expression of potentially solubly expressed SIRT1 Motif A
10	Oct. 25	Protein purification with Ni-NTA column, dialyze for buffer exchange – <i>Peer Review of Intro Draft Due</i>
11	Oct. 30	Protein purification with Ni-NTA column cont... SDS-PAGE analysis
11	Nov. 1	<i>Quiz 5</i> Determination of protein concentration: Bradford Assay and Abs280
12	Nov. 6	Circular Dichroism intro, CD analysis of protein structure – <i>Results and Discussion Outline Due</i>
12	Nov. 8	CD analysis of protein structure
13	Nov. 13	Analysis of CD results (Computer Lab)
13	Nov. 15	Notebook finalization (Computer Lab)
14	Nov. 20	<i>Quiz 6</i> Catch up day for experiments, review of entire process.
14	Nov. 22	In class work on presentations & research paper help (Computer Lab) – <i>Results and Discussion Draft Due</i>
15	Nov. 27	<i>Thanksgiving Holiday (no class)</i>
15	Nov. 29	<i>Thanksgiving Holiday (no class)</i>
16	Dec. 4	<i>Group Research Presentations</i>
16	Dec. 6	Check out – <i>Last Day of Class, Notebooks Due</i>
Final Report	Dec 13	<i>Final Report Due at 12:15 pm</i>
