Tuesdays at 4:30-5:45PM
Room Duncan Hall 250

September 26, 2017

Dr. Kim K. Burson
Achaogen, Inc.

***Making drugs for superbugs and recruiting superheroes
to help combat antibiotic resistant bacteria***

Multi-Drug Resistance (MDR) poses an urgent and growing threat globally. Over 9000 Californians are believed die each year as a result of bacterial infections obtained during hospital visits. Achaogen, Inc. is a biotech company with a focus on creating antibiotics that meet the unmet medical need for certain gram negative resistant bugs. In addition to making drugs for superbugs, Achaogen is also recruiting superheroes in many areas of the organization. Learn more about the company, job opportunities and how to be prepare for your next position in biotech.
