

CHEMISTRY Departmental Seminar

Fall 2017
CHEM 285 Schedule
Tuesdays at 4:30-5:45PM
Room Duncan Hall 250

October 3, 2017

Dr. DJ Kleinbaum
Emerald Cloud Lab

Biotech start-up stories

Starting a company is hard, but does give you some good stories! This talk will focus on the founding and progress of Emerald Cloud Lab (www.emeraldcloudlab.com), a biotechnology start-up based in the Bay Area. Topics will include fundraising, building a team, the differences between academia, large companies, and startups, and the perils and pitfalls of setting up a state-of-the-art laboratory from scratch.
