San José State University  
College of Science/Computer Science  
CS100W, Technical Writing Workshop, 01, 02, 03, and 05, Fall, 2017

Course and Contact Information

Instructor: Debra Caires

Office Location: MQH 218

Telephone: (408) 924-5166 (I answer my phone when in my office; do not leave voicemails.)

Email: debra.caires@sjsu.edu (response within 24 hours, M-F)

Office Hours: Thursday, 11:00 AM till 1:00 PM, and M-F by appointment (can be in-person or Zoom Conference Online)

Class Days/Time:
41726-01 MW 900 1015  
41727-02 MW 1030 1145
41728-03 TR 900 1015
50303-05 MW 1330 1445

Classroom:
01 MW 900 1015 SH 435  
02 MW 1030 1145 SH 435  
03 TR 900 1015 CL 238
05 MW 1330 1445 DH 450

Prerequisites:
Upper Division Undergraduate Student Standing, Pass WST

GE/SJSU Studies Category: Area Z

Course Format

This course follows a flipped model of in-class participation; the first meeting of the week will include a guided lecture and a Q&A session. The second meeting of the week will include group work and hands-on activities. Although you will work as a group, individually you will be expected to submit your work to Canvas. The slots will be time and date sensitive (deadlines set), so you will need to attend lectures and the hands-on workshops on a regular basis in order to succeed in this course.

Because you may be working with technologies that are unfamiliar to you, this course will require your patience and time to deal with technology. Here are the technologies you should have ready access to for the course:

1. An E-mail account that lets you attach and receive files - this means that you need to have enough of your storage quota left to handle files for class. Please activate your SJSU email account and check it frequently.
2. Internet Access - you will need a reliable way to browse the Web and store Web-enabled files. You will also need an understanding of working online in a cloud-based platform (Google Drive, Canvas, Dropbox, Zoom, etc.).
3. Google Chrome, Google Apps, and Google Drive: sign-up for and download plug-ins for all; please make sure your Google Chrome is the latest version. Here is the G Suite user guide to accessibility and the link is https://support.google.com/a/answer/1631886?hl=en.
4. You will need to develop your Google Plus account and Canvas account with an updated profile and profile photo; I will need to see a photo of you in your Google mail (sjsu.edu email or gmail) so that I know the identity of the sender and receiver. Additionally, you will need a clear headshot photo for Canvas or your assignments will NOT be graded.
5. Additionally, you will need a professional (personal is not preferred) Facebook page for joining the course (closed private) Facebook group. For this course please create a professional Facebook account; make sure you have a professional photo—not an avatar. Posting on this social media site will be closed and private; we use this
platform as an online forum for question and answer sessions for job announcements, guest speaker and recruiter announcements, and workshop announcements ONLY; I do not post professional development announcements on Canvas, as this platform is for academic work only. For privacy reasons, our Facebook group will be distributed and posted in lecture. For those needing assistance here is a link for Facebook Accessibility for People with Disabilities for at https://www.facebook.com/help/141636465971794

6. During the course of the semester you will also develop a professional profile on LinkedIn, Handshake, and Portfolium and post your past and current work for employers to view.

7. Zoom: you will need to activate your SJSU Zoom account (you may need to download a plug-in if you have not used Zoom in the past please visit Zoom’s Website at https://www.zoom.us/?zclid=1173&gclid=CM2aw8Hx1dUCFZEaQod2jUK0w.

8. You will need Microsoft Office 365 for education (we use Readability and Usability statistics embedded in the program) or similar office software, especially Word, Excel, and PowerPoint. If you work from home, you should be prepared to transfer files across platforms and versions of software, if necessary. Obtain this free student software from: Microsoft Software for Student Owned Machines at http://its.sjsu.edu/services/software/microsoft-students/

9. You will need to download Adobe’s Creative Cloud software, including Adobe’s Spark, from SJSU's Adobe Software Program found at http://its.sjsu.edu/services/software/adobe/

10. You will need to learn good time management skills; therefore, your instructor has already created a Google calendar for CS100W (you can add to your Google calendar during lecture) that reflects all lectures, activities, milestones, quizzes, and assignments. You will need to maintain a semester calendar that reflects ALL of your courses and their requirements. Your instructor will randomly SPOT CHECK student calendars during the semester to make sure everyone is keeping their calendars up-to-date.

In addition to having access to these technologies, you will also need a positive attitude towards learning technologies with which you may be unfamiliar and working collaboratively. In most cases, you will not need to be extremely experienced in the specific program or procedure you will be asked to use. Rather, you have to be patient and curious enough to keep trying until you learn the best way to work.

CS100W is a flipped classroom format; this means that much of what you will need to complete for assignments will be tackled in class, hands-on, and in teams; however, you will ALWAYS be responsible for submitting your work (individually) on Canvas. Attendance and participation in this course are very important. In this course, much like a lab, you will complete most of the work in collaboration with your peers and in the time provided for class meetings; it can be difficult or impossible to make-up missed work. When working in collaboration with your classmates, a lack of participation will lead to animosity among your peers and, often, a poor end result for the activity and entire team. Additionally, you will find that this course is mainly a “collaborative” class and not strictly lecture in format. Be prepared to jump-in and work (discuss topics and conduct online research) as many tasks will be required for submission in either hardcopy or uploaded softcopy directly to Canvas during our class meeting time. And, by all means, always feel free to ask questions. PLEASE ASK QUESTIONS!

Since we will be using AGILE Methodology in the classroom, every class meeting will contain a “scrum” or short stand-up team meeting. Missing your SCRUM will mean that work will be assigned to you and you will not have a voice in whether or not you wish to complete that part of the group’s activity.

Quizzes (pre and post) will be part of most, if not every, workshop meeting and activity. Do not miss out on earning these points. If you have completed the reading and taken part in the workshop activities, quizzes are very straightforward and not difficult.

Course Description

The purpose of Technical Writing, CS100W, is to develop advanced proficiency in college-level writing and contemporary research strategies and methodologies through the preparation of proposals, technical reports, and
presentations based on peer-reviewed scholarly research. Participants broaden and deepen written, verbal, and non-verbal communication skills such that the mastery of discourse accepted in academia, industry, and the international business sector is achieved by practice and evaluation within the preparation of subject-related reports, project proposals, and personal discourse.

All course assignments will be related to issues concerning careers in computer science, biotechnology, business, and industry; all written, verbal, and non-verbal communication will be assessed for correctness, clarity, and conciseness.

We will cover principles and practices of effective writing in the workplace. Technical, scientific, and electronic-mediated writing will be introduced. Each assignment includes audience and organizational needs, visual rhetoric, information design, electronic publication, ethics, technical style, usability testing, and team writing.

**GE Learning Outcomes (GELO)**

Upon completion of this course:

1. GELO 1. Learners will understand and know how to follow the stages of the writing process (prewriting/writing/rewriting) and apply them to technical and workplace writing tasks.
2. GELO 2. Learners will be able to produce a set of documents related to technology and writing in the workplace, and will have improved their ability to write clearly and accurately.
3. GELO 3. Learners will understand the basic components of definitions, descriptions, process explanations, and other common forms of technical writing.
4. GELO 4. Learners will be familiar with basic technical writing concepts and terms, such as audience analysis, jargon, format, visuals, and presentation.
5. GELO 5. Learners will be able to read, understand, and interpret material (based on primary and secondary research) related to advanced technology. Learners will have an appreciation for some of the ideas, issues, and problems involved in writing about technology and in workplace writing.
6. GELO 6. Learners will be familiar with basic sources and methods of research and documentation on topics in technology, including on-line research. Learners will be able to synthesize and integrate material from primary and secondary sources with their own ideas in a technical essay. Learners will be able to dissect a use case study and understand its parts.

**Course Learning Outcomes (CLOs)**

As CS100W is a General Education course, the course learning outcomes are identified as GELOs. Upon successful completion of this course:

1. Learners will understand and know how to follow the stages of the writing process (prewriting/writing/rewriting) and apply them to technical and workplace writing tasks.
2. Learners will be able to produce a set of documents related to technology and writing in the workplace, and will have improved their ability to write clearly and accurately.
3. Learners will understand the basic components of definitions, descriptions, process explanations, and other common forms of technical writing.
4. Learners will be familiar with basic technical writing concepts and terms, such as audience analysis, jargon, format, visuals, and presentation.
5. Learners will be able to read, understand, and interpret material (based on primary and secondary research) related to advanced technology. Learners will have an appreciation for some of the ideas, issues, and problems involved in writing about technology and in workplace writing.
6. Learners will be familiar with basic sources and methods of research and documentation on topics in technology, including on-line research. Learners will be able to synthesize and integrate material from primary and secondary sources with their own ideas in a technical blog. Learners will be able to dissect a use case study and understand its parts.
Required Texts/Readings

Textbook (Required)

*Business Communication Today*, Edition 14, by Courtland L. Bovee and John V. Thill
MyLab + eText access card ISBN 9780134562735

Other Readings (Suggested)

2. Agile for Dummies, by Mark C. Layton

Other technology requirements / equipment / material

Including the first class meeting, please bring your laptop and a power chord to every class meeting.

Course Requirements and Assignments (Required)

SJSU classes are designed such that in order to be successful, it is expected that students will spend a minimum of forty-five hours for each unit of credit [45-hours per 1-unit of credit] (normally three hours per unit per week), including preparing for class, participating in course activities, completing assignments, and so on. More details about student workload can be found in University Policy S12-3 at [http://www.sjsu.edu/senate/docs/S12-3.pdf](http://www.sjsu.edu/senate/docs/S12-3.pdf).

Student Learning Objectives (University Policy S14-5) [SLOs] (all course rubrics based on these required SLOs)

Learners shall write complete essays that demonstrate college-level proficiency. Learners shall be able to:

1. **SLO 1.** Produce discipline-specific written work that demonstrates upper-division proficiency in:
   - language use
   - grammar
   - clarity of expression
2. **SLO 2.** Explain, analyze, develop, and criticize ideas effectively, including ideas encountered in multiple readings and expressed in different forms of discourse
3. **SLO 3.** Organize and develop essays and documents for both professional and general audiences
4. **SLO 4.** Organize and develop essays and documents according to appropriate editorial and citation standards
5. **SLO 5.** Locate, organize, and synthesize information effectively to accomplish a specific purpose, and to communicate that purpose in writing
Unlike essay writing, technical writing is defined by a set of standards often rendered as document templates. Faithfully following prescriptions for documents is often portrayed as the exclusive or single goal of technical writing: it is not. However, document templates will help you organize your ideas by offering a working outline. These templates also provide for transitions among ideas. As you will see in the following grading criteria, emphasis is placed on the writer clearly defining the audience, rhetoric development, clearly presenting the purpose, and a professional presentation of each document.

**Final Examination**

Post Grammar Exam Schedule:
01 MW 900 1015 SH 435: Final Exam Monday, December 18, 0715-0930
02 MW 1030 1145 SH 435: Final Exam, Friday, December 15, 0945-1200
03 TR 900 1015 CL 238: Final Exam, Tuesday, December 19, 0715-0930
05 MW 1330 1445 DH 450: Final Exam, Monday, December 18, 1215-1430
NOTE: It should be noted that the Academic Vice President in a memorandum dated October 25, 1977 cites a university policy that states that there shall be an appropriate final examination or evaluation at the officially scheduled time in every course, unless specifically exempted by the college dean who has curricular responsibility for the course.

**Grading Information**

All students have the right, within a reasonable time, to know their academic scores, to review their grade-dependent work, and to be provided with explanations for the determination of their course grades.” See University Policy F13-1 at [http://www.sjsu.edu/senate/docs/F13-1.pdf](http://www.sjsu.edu/senate/docs/F13-1.pdf) for more details.

Due to FERPA regulations, **I do not discuss grades via email or online.**

NOTE that University policy F69-24 at [http://www.sjsu.edu/senate/docs/F69-24.pdf](http://www.sjsu.edu/senate/docs/F69-24.pdf) states that, “Students should attend all meetings of their classes, not only because they are responsible for material discussed therein, but because active participation is frequently essential to insure maximum benefit for all members of the class. Attendance per se shall not be used as a criterion for grading.”

**Grading Policy**

SJSU 100W course grade distribution is as follows: A, A-, B+, B, B-, C+, C, C-, D+, D, D- AND F

**NOTE: this course must be passed with a C or better as a CSU graduation requirement.**

**Assignments, Final Portfolio, and Pre and Post Grammar Exam Grade Distribution:**

All assignments are graded using a standardized rubric (always given to you and it is your responsibility to review grading standards)

How grades are determined when using a rubric

**4.0:** The overall communication and presentation show a high level of understanding and perspective. This assignment should be well-conceived and descriptive. The author must have a clear understanding of the audience. The work's purpose and objectives are clearly and convincingly stated. Concise background material clearly sets the context, frames, and introduces the subject. Technical content themes are logically stated and organized and support the overall objective. Data and descriptions are objectively stated and separated from interpretations. Content is detailed and suggestive. Conclusions are persuasive and well-supported by the data. The prose is easy to read. It exhibits a defined sense of unity and purpose. Includes topic, paragraph, and sentence transitions, and contains no major and few minor grammatical or technical errors. Graphics, when used, are highly informative, well-designed, and easy to interpret. The document template is used professionally, flawlessly.

**3.7:** Generally means you meet all criteria for an 'A' except presentation and problems with one or two criteria. Audience and purpose may be clear, for instance, but you failed to develop an idea. For example, a proposal that addresses the criteria provided in an RFP (Request For Proposal) but fails to develop a section pertaining to the budget.

**3.0:** Paper presents content clearly and displays a firm grasp of the material but without as much focus and
perspective as an 'A' paper. Successful effort is evident throughout the paper. Slight inconsistencies in identifying audience. The work's purpose and technical objectives may be somewhat ill-defined. Background material sets the context, frames, and introduces the subject. While well-written and adequately detailed, some sections may lack complete development and coherence. Unevenness in presentation and content. No major grammatical errors; some minor grammatical errors but none that disrupt an easy reading of the paper. Graphics are informative, intelligible and support the content of the paper. The document template used may be missing a minor element.

3.3: Exceeds the criteria for a 'B' in one or more areas. For example, the purpose of the paper may possess greater clarity. Audience is clearly identified and the contexts governing the explanation and interpretation of the information are well-detailed. Greater consistency in execution than a 'B'; better paragraph development and coherence among sentences for example.

2.7: A lack of connection among, for example, audience and purpose. A number of presentation errors affect the meaning of the sentences or structure of the text. A somewhat stronger relationship among the elements of the paper -- audience, purpose, content, style -- than a "C" paper. Still, the paper lacks full development of ideas and demonstrates some problems weaving together a complete understanding of the content with a clearly identified audience, purpose, and context.

2.3: Exceeds the criteria for a 'C' in one or more areas, perhaps more imagination in thought and explanation, greater consistency in determining audience, purpose and objective. Fewer errors in technical content and somewhat greater coherence in the presentation and the conclusion; fewer grammatical and cosmetic errors. An easier read than the 'C' paper.

2.0: Displays a reasonable grasp of the technical content but little original thought. The purpose of the work is inconsistently presented. The audience cannot be clearly identified. While understandable, the purpose and objective are not presented in relationship to the context set in the opening. Treatment of the topic is general. Lapses exist in coherence, organization, and development. Contains errors in technical content. Technical content marginally supports the conclusion; some major grammatical errors and frequent minor grammatical errors. The paper is difficult to read and lack flow. Graphics do not support content objectives. The document template used may be missing a major element; a required section of a proposal for example.

1.7: The elements of the paper -- audience, purpose, content, style -- are unclear and appear unrelated. For example, a final report about a weapons controversy may deal with a number of different systems in only a cursory way. No explanations are given about how the topics of the paper lead to one another. Presentation errors suggest no revision.

D (of any variety) or F paper will not be accepted.

Determining your course grade outcome:

I will ask you revise C- or BELOW papers until you receive, minimally, a C; you will be expected to visit the Writing Center in Clark Hall for tutoring help. You have the choice of whether or not to revise. If you select not to revise your work, you will receive the failing grade that you have earned and agreed on keeping. All assignments are graded using a detailed rubric.

Late Assignment Reminder:

Deadlines are to be met. Barring personal crisis, family emergencies, or severe illness (please let me know ahead of time), all late papers will be subject to 10% grade off per working day late; Canvas will have strict deadlines that need to be met. Except for abrupt emergencies, no requests for extensions will be heard within 24 hours before the due date (that includes for reasons of computer malfunctioning, minor illnesses, or falling behind). Finally, please refer to the revision policy (below).
Given the nature of our formal assignments, I will NOT accept late submissions in the classroom; additionally, do not slide documents under my office door, give to my office mate (as my office mate is not your instructor for CS100W), or hand-in to the CS office staff (they have been advised not to take late assignments). You will need to make PRIOR arrangements with me if you need to submit a document late. For example, if you are submitting your final portfolio late, you will need to mail the document in via mail carrier (FedEX, UPS, USPS, etc.) to:

San José State University  
Computer Science Department  
Attn: Debra Caires  
One Washington Square  
208 MacQuarrie Hall  
San Jose, CA 95192-0249

Classroom Protocol

1. You are expected to treat faculty and other students with professional respect. Do not disrupt class by leaving and reentering during class or using mobile phones. Do not distract your peers or guests by chatting. Be attentive to comments made by the instructor and by your peers.

2. You are expected to prepare for our course’s hands-on activities (the corresponding readings and videos) according to the weekly schedule. We have a limited amount of face-to-face time and we need to use our resources wisely.

3. You DO NOT have permission to record or video lectures unless you have asked beforehand. To do so violates the privacy of your peers and your instructor.

University Policies (Required)

University Policies, such as academic integrity, accommodations, etc. are available at the web page of the Office of Graduate and Undergraduate Programs: http://www.sjsu.edu/gup/syllabusinfo/
