

Slide Presentation

p r o j e c t

Project Description: Create a unique slide presentation using PowerPoint or other presentation software. Make 5 slides based on a slide template you created. Incorporate graphics, text, charts, or tables, in a visually coherent, aesthetically pleasing, easy to read design. Use transitions, animations, and interactivity appropriate for your audience. The presentation must be relevant to your theme. Submit the storyboards, a printed handout with 2 slides per page and the electronic version.
