Let us know your SJSU map based story by entering the SJSU GIS Day Story Map Competition. ESRI Story Maps allow for the combination of maps with text, images, and multimedia. Beginning now until November 11, create your SJSU Story Map. You can include images, videos, and text to guide the viewer through SJSU locations. You will need to include at least five locations/map points with supplementary content (e.g., descriptive text and media). You can work alone or in a pair. The top three Story Maps will get shared at the SJSU GIS Day on November 14.

Submissions due: **November 11, 2018, 11:59 p.m.**
