Teaching with Web Conferencing

This document lists several ways to effectively use WebEx and Blackboard Collaborate to enhance learning experience in an online class.

1. Interactions between the Teacher and students in dispersed locations.
2. Students can view recordings if they have missed a session or class.
3. Collaboration at a distance connects students from different locations to enhance the learning experience.
4. Research seminars by overseas speaker.
5. Online meeting for research groups/collaborues.
6. Fun games like treasure hunt where students will be linked through their devices on adventure trip or field trip.
7. Cooperation between teams.
8. Record sessions using application sharing for training students how to use tools or LMS.
9. One-on-One sessions can be scheduled to get questions answered or receive help with assignments.
10. Teachers can have virtual office hours for students with Blackboard Collaborate.
11. Student Presentations online.
