The Incubator Classroom, CL111

is a 50-seat learning space equipped with flexible furniture, standard white boards, highly configurable technology including three projection systems with two Smart boards, Mac and PC workstations and laptop computers, document camera and a combination DVD/VCR deck.

Turning the System ON

1. Touch the control panel.
2. Press “All Projectors” button.
3. Wait for system to power on.
Select Sources

Choose from Computers, Document Camera or DVD Combo

Select Computers

Choose from Podium PC, Podium Mac, Podium Laptop 1 or Wall Laptop

Windows and Mac workstations are built into the podium. Connect your laptop to cables at the podium or at the front wall.

EXAMPLE:

Selecting Podium Mac

1. Select Podium Mac on the panel.
2. The Podium Mac appears on the Preview Monitor on the podium. Whichever source is selected displays on the Preview Monitor, in this case the Podium Mac. The selected source does not go to the projectors automatically.

3. Select the screens that you want the Podium Mac to project to. In this example, we’ve selected the Left, Center and Right screens.

   Left = *Left Smart Board*
   Center = *Main Projector*
   Right = *Right Smart Board*

4. The Podium Mac displays on the Preview Monitor, and the left, center and right screens
Podium Extensions

1. The podium includes separate USB extensions for the Podium Mac and Podium PC, for flash drives and other accessories.

2. The podium includes one keyboard and mouse. It is switchable between the Mac and PC using the “Key & Mouse Switch” located above the USB extensions. Press the switch once to switch control to the Podium Mac or the Podium PC.

3. The podium drawer holds some accessories, including remote controls and laser pointers for both Mac and PC, as well as adapters for connecting Macintosh laptops to projectors.
Podium Cables

1. The Podium includes cables to connect a laptop computer to either HDMI or VGA/audio connections.

2. The podium has a network cable which you can connect to your laptop.

3. The podium also has a USB cable to connect your laptop computer to the Smart boards. You will need the Smart software installed on your laptop in order to utilize the functions of the Smart board technology.
Other Sources

1. The Document Camera is housed in a drawer in the podium.

2. The DVD / VCR combo is housed in the rack inside the podium. The remote control is in the top drawer in the podium.

3. The Smart boards are located to the left and right of the main screen.
Turning the System OFF

1. Press the Home button.

2. Press the Power Off button.

3. Confirm shutdown.

4. Progress bar displays shutdown.
