Course Description
Concentration on the theoretical aspects of money and monetary policy. Early and modern theories of money demand; early Keynesian and Monetarist monetary analysis; expectations and dynamic monetary business cycles; monetary policy under the Keynesian, Monetarist and New Classical assumptions; open economy monetary theory.

Course Learning Outcomes and Program Learning Objectives
From the perspective of modern monetary theory, we will examine the historical evolution of money and its impact on economic activity and prices. In the process, we will consider, compare, and contrast alternative monetary policies and regimes. This course emphasizes Economics MA PLOs 2 (Macroeconomics) and 4 (Specialist Areas: Financial Economics and Policy Economics). Students should come to the course having some familiarity with both macroeconomic models and the modern financial system.

Course Learning Outcomes
Upon successful completion of this course, students will be able to:

Explain money’s vital function and how it interacts with banking and the financial system.

Explain how the interaction of the demand and stock of money determine the price level.

Explain seigniorage and the role it has played in the history and evolution of government involvement in the monetary and financial system.

Explain the complicated relationships between money, interest rates, and fiscal policy.

Have some familiarity with the various factors that play a role in financial crises.
Required Texts/Readings

Textbooks

Other Readings
In addition to the above, the red Course Reader contains copies of or links to additional readings assigned for each week. Available at Maple Press, 330 South 10th Street.

Classroom Protocol
We will conduct this class as a graduate seminar. Rather than only listening to lectures, students should be prepared to discuss the assigned readings for each session. Participation in these discussions will determine 15 percent of a student's overall grade. If a student misses a class, they must turn in at the next class a brief written summary of the readings assigned for the class they missed. These written summaries must be at least 400 words long, neatly typed. I also encourage students to record classes if they believe doing so will help their studying.

Assignments and Grading Policy
Participation in class discussions will determine 15 percent of a student's overall grade. The final examination, which will be comprehensive, is worth another 50 percent out of the total of 100, whereas a mid-term examination is worth 35 percent.
