Renewable Energy Internship

Califia FArms

Southern California, CA

Type: Full Time

California based beverage company Califia Farms is seeking a graduate student to research renewable energy options to help the company achieve its goal to achieve 100% renewable electricity by 2020. The student will evaluate on-site and off-site options and various financing mechanisms including Power Purchase Agreements, community solar, virtual net metering and other opportunities. The ideal candidate will have experience and training in renewable energy policy, finance and technology. The production facility is based in Bakersfield, CA and the corporate offices are in Los Angeles, however it is not necessary that the intern be located near the facilities. Start and completion dates are flexible. Inspired by the bounty of California, Califia Farms’ mission is to innovate delicious plant-powered foods for mindful nourishment. The Company is a leader in the revolution to decommoditize the food and beverage industry by creating innovative, healthy and great-tasting premium beverages that make it easy for consumers to go ‘plant-powered’ and dairy-free, without compromise. Founded in 2010 by a farmer’s co-operative based in the San Joaquin Valley and headed by beverage visionary Greg Steltenpohl, Califia Farms is one of the fastest-growing natural beverage companies in the U.S., as well as the leading brand in the natural products coffee drinks category. In 2015, Califia Farms was named “Brand of the Year” by BevNet and a “Breakout Brand” by Beverage World.” in 2016, CircleUp25 named Califia Farms on Forbes.com “one of the 25 Most Innovative Consumer Brands.

If interested, please send a resume and cover letter detailing your availability to: Eli Steltenpohl, eli@califiafarms.com
