

HS 267D Session 4

Announce calendar modifications.

How to Do Labs - On Sunday 2/8/09 we had a special session called “How to Do HW”. The same principles apply when doing labs:

- Approach labs to explore ideas
- Make few assumptions (answer questions as *written* and do not take imprudent liberties with meaning)
- Ask about meaning and technique when uncertainty exists
 - Do *not* consult students who have similar misunderstands (this only perpetuate errors)
 - *Do* consult with instructor and high performing students (this corrects errors)
- Don't guess
- Don't be afraid to ask for *specific* clarification
- Specific examples follow...

HW

- Review Lab 2, Lab 3, HW 1 – 3.
- Prepare for an exam
