SJSU Campus Utilization Report

Summary and Findings

The Fall 2011 utilization calculation amendments reveal the continuing trends as follows:

1. A substantial number of teaching laboratories have been converted into other uses, such as lecture space; self-instructional computer laboratory; laboratory support services, and research space. Consequently, the total teaching laboratory capacities are reduced, and conversely, the lecture capacities increased.
2. The overall utilization of lecture spaces is normal. There are numerous situations that are complicated a number of teaching laboratories used as lecture classrooms generating extremely high utilizations.
3. Many departments conduct classes either in a combination multimode lecture/lab class setting or hold the instruction and corresponding (open) lab in separate locations. These classes, while serving two functions are listed in the course section reports only once under one room. While these open labs are being used in association with a specific class, they may show 0% utilization because the instructional portion of the class is scheduled in a different location. Unfortunately, the database codes do not include multimode class structures showing a polarized pattern, with some laboratories showing 0% use, while the other laboratories showing usage in excess of 200%. Until the CSU amends multimodal usage to the space standards, campus will continue to struggle to reconcile these utilization patterns.
4. Many departments utilize specialized equipment which excludes other programming or other department uses in these spaces.
5. In terms of the mode of teaching, trends towards technology rather than physical modeling or activities may explain lecture-type utilization patterns while using the generous space allowances provided in the teaching laboratories.
6. Lastly, the low utilization of the teaching laboratories could also be explained by budgeting issues. The cost to generate one FTES in teaching laboratory is three times the cost to generate one FTES in lecture because it requires three weekly-student-contact-hours for each FTES in teaching laboratory, compared to one weekly-student-contact hour for each FTES in lecture. We should, however, be aware of the adverse impacts on the quality of our academic programs in our decreasing offerings of laboratory courses.

2012/2013 Laboratory Enrollment FTES Vs Laboratory Capacity FTES

LABORATORY ENROLLMENT FTES
vs.
LABORATORY CAPACITY FTES

Introduction

This report provides a comparison between enrollment FTES and capacity FTES of teaching laboratories by discipline. The data used for this comparison are derived from the Academic Planning Database (APDB) for 2009-2010 and the Space and Facilities Database (SFDB) for fall 2010. The total FTES for teaching laboratories at target 2018/19 are from the Summary of Campus Capacity (CPDC 1-2).
