Sergeant Alfred 'Reed' McLaughlin was a latent print specialist with LAPD in the 1950's. He and his wife, Virginia, left an endowment to the California Association of Criminalists to fund CAC-sponsored research and training.

The endowment was funded initially upon the passing of Reed McLaughlin and was later nearly doubled upon the passing of Virginia. Like many crime scene investigators of his era, Reed used benzidine in his work to detect minute quantities of blood. Sergeant McLaughlin died of cancer that was linked to using benzidine with bare hands.

This scholarship is specifically intended for the purpose of funding student research and training. The funds may be used for travel, lodging, attendance and registration at forensic science meetings and to offset costs incurred for research and presentation of results at a CAC meeting.

The purpose of the police school was to provide professional training for students with a definite interest in, and adaptability to, a police career. Although the specific requirements for admission to the school were modified somewhat during this period, background investigation, height, weight, and age were still criteria utilized for admission.

Under Schmidt’s leadership, the Department expanded to include a Penology Major, designed to provide “professional training for the qualified student who had an interest in a career in rehabilitation, parole, and probation.” The spirit of expanding educational opportunities to help professionalize careers in criminal and social justice thrives in the Department to this day.
