Course Description
This course will generally concern itself with examination of the drug problem, particularly as it relates to practitioners in criminal justice and health sciences. Class participants will be exposed to areas of drug classification, identification, pharmacology, and current trends. Current research in the field of chemical dependency will be presented.

This course will also deal to a large extent with the physical, psychological, social and legal ramifications of drug abuse and addiction, including areas of education, recovery, and treatment. Students will be introduced to such treatment modalities as: local community based drug treatment programs, narcotic replacement therapies, and recovery peer support groups. Other areas of concern will include the study of decriminalization, harm reduction, and legalization.

Course Objectives
Students will acquire a basic knowledge of drugs and their classifications. Students will become familiar with current social problems precipitated by drug abuse and addiction, including areas of control and management. Students will also gain insight into the many reasons why people abuse drugs and how society responds to such abuse. Students will gain an understanding of contemporary drug laws designed not only to inhibit drug abuse, but to also treat individuals who are chemically dependent.

**Field Paper/Family History**
Students will complete two (2) papers, choosing from four (4) options, and will be afforded an opportunity to attend either Treatment Court Graduation, a 12-Step Meeting, or interview a counselor at a local Residential Substance Abuse Program or Sober Living Environment. An additional option involves writing a family alcohol and/or drug history. A detailed explanation is attached. The field papers will expose students to outside programs that greatly assist chemically dependent individuals in remaining clean and sober and holding them accountable. The last option will allow students to explore their own family history.

*Spelling or grammatical errors will result in point deductions.*

**Extra Credit**
This research paper will consist of an 8-10 page paper using the American Psychological Association (APA) format. The instructor must approve the topic in advance. A maximum total of 25 points will be allowed, and spelling or grammatical errors will result in point deductions.

*Note: Attendance will not be taken in this class; however, much of the exams will be based on lectures, videos, and guest speakers.*

**Sample Questions:** What is the program modality; i.e. social model, medical model, therapeutic community, Sober Living Environment? What is the program format; i.e. group, individual counseling? What length is the program? What is the population make-up; i.e. gender specific, co-ed? Does the program offer bilingual services? Do they use 12-step or other philosophy? How do they define and measure their success rate?
Option #4 - Family Alcohol/Drug History - Type a four (4) page, double-spaced paper on your family history. This exercise is confidential and will be returned to you. The format may include, but not limited to, any of the following:

1. If you know your family history, are there any relatives, distant or otherwise, which were thought to have issues with alcohol and/or any other drugs? This includes nicotine, prescribed medication, and any over-the-counter medication. This might be a grandparent on either side of your family, or Uncle Joe or Aunt Mary. Were they identified as an alcoholic or addict, or just known to imbibe or use sporadically?

2. Within your immediate family, is there any history of the above? What messages were you given growing up regarding any use of alcohol and/or any other drugs? Was this forbidden, considered something that would bring shame to the family, or was use normal behavior?

3. What are your own personal experiences and attitudes regarding use or abuse of alcohol and/or other drugs?

**Spelling and grammatical errors will result in a point deduction.**
