COURSE DESCRIPTION:

Theories of Crime & Delinquency deals with the analysis of the nature and extent of crime, including causation and prevention. Descriptions of offenses, criminal typologies, and victim surveys. Evaluation of various prevention and control strategies are discussed.

The financial and human costs of crime are staggering. Crime and criminality rank as one of the top issues in the list of American concerns.

This course is designed to explore the nature of crime and criminality. In order to do so, we must first understand how crime is "officially" defined and the workings of the criminal justice system relative to that definition. We must also understand the extent of crime (which is not an easy thing to do!) To that end, we will discuss various ways of measuring crime and how that may color our definition of crime. Our discussion of the extent of crime, will be guided by a discussion of various types of crime.

The majority of the class lectures and discussions will focus on various theoretical explanations of crime and criminality. We will discuss psycho-biological, socio-economic, and socio-cultural perspectives in criminology.

OBJECTIVES:

1. To examine legal definitions of various acts as criminal.
2. To review the workings of the criminal justice system.
3. To understand the extent of crime.
4. To identify the ways of measuring crime.
5. To analyze various theoretical explanations of crime and criminality.

REQUIRED READING:

The books are available at the Spartan bookstore as well Robert's bookstore. Other readings may be assigned to supplement the text. These will be placed on reserve in the library or made available to the student in class. Students are also expected to keep up with recent developments in the criminal justice area by reading a daily newspaper such as The San Jose Mercury News, The San Francisco Chronicle, The Los Angeles Times, or The New York Times.
YOU ARE ENCOURAGED TO CONTRIBUTE TO CLASS DISCUSSION REGARDING CURRENT EVENTS AND ISSUES.
