Course Description
The primary purpose of the class is to identify, discuss and analyze selected problems in the criminal justice system. Mandatory prerequisites for the class include: 1) JS 105, 2) 100 W or equivalent, and 3) senior standing (2nd semester seniors will be given preference). A selected criminal justice topic will be explored through the preparation of a policy paper. Three units.

Course Objectives
To provide the student with an opportunity to critically analyze contemporary problems and policies regarding the justice system through in-class discussion of assigned readings; the preparation and presentation of policy paper based on empirical research findings.

Text

Course Requirements
1. Participation: come to class prepared to discuss and critique assigned readings; prepare a Most Important Topics (MITs) discussion of three (3) topics for each chapter you consider the most important.

2. Policy paper: prepare a literature review/policy analysis paper of an approved justice-related topic; the topic must not have been previously written on or researched.

3. Presentation: a formal class presentation of the policy paper, including topic outline and reference page.

Class Evaluation
Policy paper/presentation = 50%
Participation = 30%
MITs = 20%

Note: A grade of C- must be earned to fulfill this course requirement.

Class Participation
In order to participate, one must be in attendance. Attendance per se, however, is not considered to be participation, and cannot factor into the grade. In class comments indicating knowledge of the subject matter and/or asking probing questions is considered to be participation. This means that assigned materials must be read and "digested" prior to each class meeting.

Participation Grading: Levels of participation will be assessed on a weekly basis with an overall grade determined at the end of the class. Assessments will be based on pertinent and knowledgeable comments with respect to chapter materials (see MITs below), and additional follow-up comments regarding other student comments. Daily scores will be assigned on a plus, credit, or no credit basis. A plus is based on 2 to 3 pertinent and knowledgeable comments; credit is based on 1 to 2 comments; no credit is assigned if no pertinent or knowledgeable comments are made, or if one is absent from class. An overall score, based on a class curve, will be assigned.

MITs: A participation requirement is that you identify three (3) Most Important Topics (MITs) for each chapter; these are topics that you believe to be particularly crucial and insightful and will be the basis for your class discussion. Each chapter's MIT will consist of three parts: (I) Describe the topic itself (utilizing key words and phrases), (II) Explain why you believe the topic to be important (impact or practice), (III)
Support

the topic with empirical data, information, and/or logical argument (utilizing original sources in Walker); cite the original source internally using APA 5th ed.

MIT Preparation: Each MIT will be typed, double spaced, identified by chapter, and handed in at the end of the class. Keep each chapter’s MITs on a separate page. They will be collected randomly; that is, you must be in attendance to hand them in (no exceptions except medical with documentation). Students will be chosen to discuss their MITs; you may also volunteer.

MIT grading: MITs will be graded on a plus, check, or no credit basis. A plus will consist of all three parts (described above) for each MIT, including proper “original” citations from the text. A check will consist of all three parts; not as well thought out/reasoned. A no credit will consist of not meeting requirements for a check; or being absent. Other considerations in grading: using your own words (paraphrasing not allowed and will result in no credit); proper citations (APA, 5h ed.); sentence structure; and grammar. Missing 3 MITs will result in a failing grade.

Policy Paper

A policy paper on a justice-related topic (on which you have not previously written) will be required. You, in consultation with the instructor, will choose an appropriate topic. Once chosen, a topic may not be changed without instructor consent. The paper will review the empirical literature on the topic, and will formulate new or improved policies based on the empirical evidence.

The goal of the paper is to review research-oriented journals for empirical articles which establish relationships between and among independent and dependent variables, and to draw policy implications based on these empirical relationships.

Paper Requirements

1. 12 to 14 pages in length (not including reference pages and appendices). Note: A page is considered to be 250 words in length; thus, the paper must be a minimum of 3,000 words and a maximum of 3,500. Required format: Times New Roman with a 12 font.

2. Include a minimum of five (5) total references, with a minimum of three which are empirical in nature (i.e., articles from research journals that identify significant relationships between and among variables). 2 of 3 empirical articles must have been published within the last ten years (1997 or later).

Note: Internet references that are not empirical may not be used. The empirical articles can most easily be found in the Criminal Justice Abstracts (can be found on library website).

3. No plagiarism or prior work on topic.

4. The paper and research must be described in your own words; with NO paraphrasing using the author’s words, or through the use of lengthy quotes or descriptions. For this paper USE NO QUOTES.

5. The three empirical research articles must be turned in with the paper.

6. American Psychological Association (APA) 5th ed. citation style must be used. This includes a References Cited section at the end of the paper containing all the sources used in the paper.

7. The paper must be organized according to the Paper Format section; see Parts I-IV described below.

8. The paper must be written in formal English (i.e., avoid contractions such as can’t, don’t, won’t; abbreviations; and slang), using proper punctuation, tenses and so on. Spelling and grammar are also considered important; too many of these errors will lead to a mandatory one grade point deduction. Hint: Proofread the paper (more than once) prior to handing it in.

Common paper errors include: (1) APA format not followed (in paper or reference section); (2) cites in the paper do not match those in the reference section; (3) inadequate description of studies; (4), weak policy implications; (5), policy implications not matching the research reviewed, and (6) paper titles that do not specify relationships between or among independent and dependent variables.
**Paper Grading:** Meeting minimum requirements 1 through 8 means that the paper is at least at the C-level. A **failing** grade will be assigned if requirements 1-5 are not met. One grade point will be deducted for requirements 6, 7 and 8 if they are not met.

**Due Dates**

Final papers, and research articles, are due on the last class meeting (see schedule). Papers can be late only if **excusable and documented due to serious illness or tragedy.** One grade point per day late will otherwise be deducted.

**Presentation/Paper Outline**

A 15-20 minute **formal** presentation of your policy paper is required. The presentation will be based on a brief **outline** (2 pages) and reference page of sources cited, which will be distributed to the class prior to your presentation. 4 X 6 cards should be utilized for the presentation. The outline will be formatted as follows: **Part I: Introduction** (brief overview); **Part II: Research methodology** of each of the three empirical studies reviewed (see below); **Part III: Policy implications**.

**Grading:** Since the presentation is informal, it is assumed that the presentation/outline will fall in the normal range, and thus will not be graded. However, if the presentation far exceeds standards, a one-quarter point grade upgrade (+.25) will be added to your paper; conversely, a presentation far below standards (i.e., not meeting requirements) will result in a one-quarter grade point reduction (-.25) added to your paper.

**Paper Format**

The paper **must be organized** according to the following format:

**Part I: Introduction**

This section includes a relatively brief introduction to the topic; may include history of subject, relevance, concepts, definitions, current policies, and so on.

**Part II: Review of Literature**

This section primarily describes the research on the subject, and focuses on defining the major relationships (statistical) between and among independent and dependent variables (e.g., the relationship between a treatment program and recidivism).

First, introduce each study by author(s), purpose, and study design (i.e., Smith and Jones (2007); the impact of higher education on police officer behavior; survey, experimental, quasi-experimental, observation, etc.).

Second, describe the research methodology of each study with respect to:

- **Sample** (number of subjects and how chosen)
- **Variables Measured** (independent, dependent, and control variables; e.g., age, race, gender)
- **Findings:** (statistically significant relationships between/among variables).
- **Limitations:** (variables not controlled)

**Note:** not all research is created equally; that is, more **valid** and **reliable** research is found in academic journals (e.g., Criminology, Crime & Delinquency, Justice Quarterly, Police Quarterly, Journal of Criminal Justice). Practitioner journals, (e.g., Federal Probation and Police Chief), tend to include only program descriptions or non-scientific research. Further, relatively short articles (3-5 pages) should be avoided, since they are unlikely to provide valid and reliable research findings.

**Part III: Summary and Policy Implications**

Provide a brief overview of the findings of the empirical studies reviewed. From the research results, the need for new and/or improved policies will be described. These policy changes and revisions must be based on a realistic assessment with respect to budget, time, resource allocation and constraints, and politics. This suggests that the policies should be aimed specifically at program developments with respect to the research reviewed.
