
Dr. Franklin E. Zimring
Boalt Hall School of Law, UC Berkeley

About the Book

The forty-percent drop in crime that occurred across the U.S. from 1991 to 2000 remains largely an unsolved mystery. Even more puzzling is the eighty-percent drop over nineteen years in New York City. Twice as long and twice as large, it is the largest crime decline on record.

In The City That Became Safe, Franklin E. Zimring seeks out the New York difference through a comprehensive investigation into the city’s falling crime rates. The usual understanding is that aggressive police created a zero-tolerance law enforcement regime that drove crime rates down. Is this political sound bite true—are the official statistics generated by the police accurate? Though zero-tolerance policing and quality-of-life were never a consistent part of the NYPD’s strategy, Zimring shows the numbers are correct and argues that some combination of more cops, new tactics, and new management can take some credit for the decline. That the police can make a difference at all in preventing crime overturns decades of conventional wisdom from criminologists, but Zimring also points out what most experts have missed: the New York experience challenges the basic assumptions driving American crime- and drug-control policies.

About the Author

Franklin E. Zimring is the William G. Simon Professor of Law and chair of the Criminal Justice Research Program at the University of California, Berkeley. Since 2005, he has been the first Wolfen Distinguished Scholar at Boalt Hall School of Law. Professor Zimring’s recent books include The Great American Crime Decline and (with David T. Johnson) The Next Frontier: National Development, Political Change, and the Death Penalty in Asia.
