Course Description

Aerobics incorporates exercise and music, using large, continuous, rhythmic movements to elevate the heart rate and produce a training effect. The course is designed to improve muscle tone and enhance cardiorespiratory endurance.

Course Goals

Following activities and assigned reading, students will be able to demonstrate through class activities/assignments, skills tests, and written exams:

- Knowledge of fundamental skills, technique and execution of exercises.
- Proficiency in execution of the skills covered.
- An understanding of the history, rules, strategies, current research, safety and etiquette associated with aerobic exercise.
- An understanding of the mental and physical health benefits to be derived from aerobic exercise
- An appropriate level of proficiency in personal fitness as it relates to components such as cardiovascular endurance, muscular strength and endurance, flexibility, body composition, balance, coordination, and agility.

Course Learning Outcomes

After successful completion of this course, students will be able to:

- Demonstrate increased knowledge in the history, rules, strategies, current research, safety, and etiquette related to the specific activities completed as measured by Beginning and End of the Semester Survey.

- Demonstrate improved cardiovascular health and increased fitness as measured by pre-and post-Fitness Assessment.

Textbook
