ME/EE 106 - Fundamentals of Mechatronics Engineering

Instructor: Buff Furman (http://www.sjsu.edu/people/burford.furman/)
Office Location: Engineering 310G
Telephone: 408-924-3817
Email: burford.furman@sjsu.edu

Office Hours: M 1330 – 1430, Tu 1330 – 1430, Th 1330 – 1430, or by appointment

Class Meeting Information

ME 106 Seminar 01 (27103): MW 1630 – 1720 room: Engineering 189
Lab 02 (27104): Tu 1330 – 1615 E125 NOTE! First meeting on 02/04/20
Lab 03 (27105): Wed 1800 – 2045 E125 NOTE! First meeting on 02/05/20
Lab 04 (27106): Thurs 1330 – 1615 E125 NOTE! First meeting on 02/06/20
Lab 05 (27107): Thurs 1800 – 2045 E125 NOTE! First meeting on 02/06/20
Lab 06 (27108): Fri 0900 – 1145 E125 NOTE! First meeting on 02/07/20
Lab 07 (27109): Fri 1330 – 1615 E125 NOTE! First meeting on 02/07/20
Lab 08 (27110): Mon 1330 - 1615 E125 NOTE! First meeting on 02/03/20

EE 106 Seminar 01 (29435): TuTh 1630 – 1720 room: Engineering 189
Lab 02 (29436): Tu 1330 – 1615 E125 NOTE! First meeting on 02/04/20
Lab 03 (29437): Wed 1800 – 2045 E125 NOTE! First meeting on 02/05/20
Lab 04 (29438): Thurs 1330 – 1615 E125 NOTE! First meeting on 02/06/20
Lab 05 (29439): Thurs 1800 – 2045 E125 NOTE! First meeting on 02/06/20
Lab 06 (29440): Fri 0900 – 1145 E125 NOTE! First meeting on 02/07/20
Lab 07 (29441): Fri 1330 – 1615 E125 NOTE! First meeting on 02/07/20
Lab 08 (29442): Mon 1330 - 1615 E125 NOTE! First meeting on 02/03/20

Prerequisites: EE 098 and ME 030 (or CS 49C OR CMPE 30 OR CMPE 46) or their equivalents (with a grade of ‘C-’ or better in each). For IT majors: TECH 060, MATH 071, CMPE 046 (with a grade of ‘C-’ or better in each).

Accessing Course Materials and Messaging

Copies of the course materials such as the syllabus, major assignment handouts, etc., may be found on the SJSU Canvas course management system: https://sjsu.instructure.com/courses/1357828. You are responsible for regularly checking for updates and reading messages that I may send to you through mySJSU, Canvas, Piazza, or other system.

Course Description

Introduction to mechatronics with emphasis on analog electronics, digital electronics, sensors and transducers, actuators, and microprocessors. Lectures are intended to provide the student with foundational concepts in mechatronics and practical familiarity with common elements making up mechatronic systems. Laboratory experiments are designed to give the student hands-on experience with components and measurement equipment used in the design of mechatronic products. (3 units; lecture/lab)

Course Goals and Learning Objectives

The goals of this course are to help you:

1. Develop an understanding of the basic elements underlying mechatronic systems: analog electronics, digital electronics, sensors, actuators, microcontrollers, and embedded software.
2. Understand how to interface electromechanical systems to microcontrollers.
3. Gain hands-on experience with commonly used electronic test and measurement instrumentation.
4. Improve written communication skills through laboratory and project reports.
5. Gain practical experience in applying knowledge gained in the course through a hands-on project.
Learning Objectives

The student who successfully completes the course will be able to:

1. Articulate what the essence of mechatronics is and provide examples of mechatronic systems.
2. Explain the concepts of input and output impedance, voltage division, and circuit loading.
3. Explain the concept and characteristics of a signal source.
4. Design and analyze the performance of RC low-pass and high-pass filter circuits.
5. Explain the basic structure of a microcontroller, the nature of IO ports, and the common peripheral subsystems found in most microcontrollers.
6. Write embedded software to successfully interact with sensors, power interfaces, analog and digital IO ports, and other peripheral elements in the control of a mechatronic system.
7. Explain what analog-to-digital-conversion (A/D) is and how to implement it using a microcontroller.
8. Select and configure operational amplifier circuits to achieve desired interfacing requirements between a signal source and a downstream device such as a microcontroller or data acquisition system.
9. Explain the practical limitations of operational amplifiers and quantitatively estimate the effects of these limitations on output voltage and current of the op-amp.
10. Explain the basic operation of bipolar and MOS field-effect transistors and design with them to activate solenoids, relays, motors, etc. from signal sources.
11. Explain the input/output characteristics of digital logic devices and design a logic circuit to accomplish a given task.
12. Explain the underlying operational principles and construction of electromagnetic actuators such as DC, AC, and stepping motors.
13. Determine the torque and speed requirements for a given motion control application considering system inertia, external forces or torques, and motion profiles and select an appropriate motor.
14. Function effectively as part of a team in carrying out laboratory experiments and open-ended projects.
15. Document a laboratory experiment and open-ended projects clearly and completely in written form.

Text

Required Textbook

Recommended Textbooks

Required Hardware
Adafruit Feather M4 Express (https://www.adafruit.com/product/3857) and a USB A – micro B *data* cable. EduShields Inc. (Eric Wertz) will be selling the FM4E during the first and second week of class. You can save yourself time and money by buying a board from Eric that already has the headers soldered and that comes with a USB cable. If you miss the opportunity to buy from Eric, you’ll need to order from Adafruit and solder your own headers. If Adafruit is out of stock, check Mouser (https://tinyurl.com/y5x8476b), Digikey (https://www.digikey.com/products/en?mpart=3857&v=1528), or Evil Mad Scientist (https://shop.evilmadscientist.com/productsmenu/916 located in Sunnyvale). You will also need a WiFi enabled device, such as a smartphone, laptop, or tablet for in-lecture exams and quizzes. Such devices can be borrowed from Student Computing Services if you unable to obtain your own. See: http://library.sjsu.edu/student-computing-services/equipment-loans
Library Liaison

Our liaison to the University Library is Rachel Silverstein <rachelsilverstein@sjsu.edu>, 408-808- 2106. Rachel can help you make optimum use of information resources available to you through the University Library.

Classroom Protocol

I expect everyone to make their best effort to attend all class sessions and laboratory periods. Please arrive to the classroom or laboratory before the session begins, so that others are not disturbed by your entry after instruction has begun. If you normally keep a cell phone activated and with you, put your cell phone on ‘vibrate’ before you enter the classroom. Having your cell phone ring during class is disruptive, and will not be tolerated.

Dropping and Adding

Students are responsible for understanding the policies and procedures about add/drops, academic renewal, etc. Information on add/drops are available at http://info.sjsu.edu/home/schedules.html. Information about late drop is available at http://www.sjsu.edu/aars/policies/latedrops/policy/. Students should be aware of the current deadlines and penalties for adding and dropping classes.

Assignments and Grading Policy

Assessment for the purposes of determining your course grade will consist of evaluating your performance on homework assignments, laboratory reports, quizzes and examinations, projects, and the final examination.

Quizzes may take place in lecture and/or lab and may be unannounced (so keep up on your reading and studying for this class). Check the ME 106 Course Schedule listed below for links to the homework and laboratory assignments.

Homework will be submitted by upload to Canvas approximately one week after it is assigned. Late submissions might receive partial credit, but this will be at the discretion of the grader (don’t count on it). All submissions must be clear and legible. If the grader cannot read what you have submitted, you will not receive credit for it.

Laboratory reports will handled similarly. Unless stated otherwise by your lab instructor, softcopy must be uploaded to the Canvas assignment one week after the laboratory experiment was performed.

The weighting of the course components and criteria for assigning letter grades are given below.

Weighting of Course Components for Determining the Course Grade

HW 10%, Lab Reports 20%, Project 20%, Midterm 10%, Quizzes 5%, Final Exam 20%, and Individual Performance on the Term Project 15%

Criteria for Assigning Letter Grades

The scores on your homework, laboratory reports, quizzes and exams, term project, final examination, and individual performance will be combined and totaled using the weighting scheme described above. Note: your overall percentage shown in Canvas Grades is a very approximate estimation of your overall percentage. I calculate final grades offline, because Canvas is not flexible enough when it comes to making normalizing scores and making adjustments. Thus, what you see may not be what you get. A final letter grade will be determined from your overall performance (percentage) using the following criteria:

A 100 – 93%; A- 92 – 90%; B+ 89 – 87%; B 86 – 83%; B- 82 – 80%; C+ 79 – 77%; C 76 – 72%;
C- 71 – 69%; D+ 68 – 66%; D 65 – 62%; D- 61 – 59%; F <58%. Note: ME students must earn at least a grade of C- to pass the course.

The final examination for the course will be Tuesday, May 19, 2020 from 1445 - 1700 in room E189. You may need a WiFi enabled device, (i.e., a laptop or a tablet computer) for the final exam. Such devices can be borrowed from Student Computing Services if you do not have your own. See: http://library.sjsu.edu/student-computing-services/equipment-loans for more information.

University Policies

Academic Integrity (This section is important, so make sure you read it! You will be held accountable to its stipulations.)

Your commitment as a student to learning is evidenced by your enrollment at San José State University. The University’s Academic Integrity policy, located at http://www.sjsu.edu/studentconduct/docs/S07-2.pdf, requires you
to be honest in all your academic course work. Faculty members are required to report all infractions to the office of Student Conduct and Ethical Development. The Student Conduct and Ethical Development website is available at http://www.sjsu.edu/studentconduct/.

Instances of academic dishonesty will not be tolerated. Cheating on exams or plagiarism will result in a failing grade and sanctions by the University. For this class, all assignments are to be completed by the individual student unless otherwise specified. If you would like to include in your assignment materials that were previously graded in another course, or you are planning to submit work simultaneously for ME 106 and another class, please note that SJSU’s Academic Policy S07-2 requires prior approval by the instructor.

Plagiarism is defined as, the use of another person’s original (not common-knowledge) work without acknowledging its source. Examples of plagiarism include, but are not limited to:

- copying in whole or in part, a picture, diagram, graph, figure, program code, algorithm, etc. and using it in your work without citing its source
- using exact words or unique phrases from somewhere without acknowledgement
- putting your name on a report, homework, or other assignment that was done by someone else

Students are expected to familiarize themselves with how to avoid plagiarism. Several helpful resources can be found at: https://communitystandards.stanford.edu/student-conduct-process/honor-code-and-fundamental-standard/additional-resources/what-plagiarism

Note: I encourage students to collaborate on assignments, such as homework and lab reports, however what this means is that you can work together to decide on solution strategies, discuss what should be included in reports and how they should be organized, etc., but you may not copy answers in whole or in part (this includes program code), and you must write your own lab reports. Unless otherwise specified, all assignments are to be completed by each student individually.

SJSU Senate Policy S12-3 - Federal Regulation of the definition of the credit hour:

Success in this course is based on the expectation that a student will spend, for each unit of credit, a minimum of 45 hours over the length of the course (normally three hours per unit per week with one of the hours used for lecture) for instruction or preparation/studying or course related activities including but not limited to internships, labs, clinical practica, etc. Other course structures will have equivalent workload expectations as described in the syllabus. [Thus, for this class, it is expected that you will spend at least seven hours outside of class working on homework, lab work, project work, test preparation, etc. If you put in less time than this, you may not pass the course and you will not learn all that you could :() See: http://www.sjsu.edu/senate/docs/S12-3.pdf for more information.

Campus Policy in Compliance with the American Disabilities Act

If you need course adaptations or accommodations because of a disability, or if you need to make special arrangements in case the building must be evacuated, please make an appointment with me as soon as possible, or see me during office hours. Presidential Directive 97-03 requires that students with disabilities requesting accommodations must register with the AEC (Accessible Education Center) to establish a record of their disability.

Student Technology Resources

Computer labs for student use are available in the Academic Success Center located on the 1st floor of Clark Hall and on the 2nd floor of the Student Union. Additional computer labs are available for ME students in E213 and E215. Computers are also available in the Martin Luther King Library (see: http://library.sjsu.edu/student-computing-services/equipment-loans).

A wide variety of audio-visual equipment is available for student checkout from Media Services located in IRC 112. These items include camcorders, video players, 16 mm, slide, overhead, DVD, CD, and audiotape players, sound systems, wireless microphones, projection screens and monitors.

---

SJSU Writing Center
The SJSU Writing Center is located in Room 126 in Clark Hall. It is staffed by professional instructors and upper-
division or graduate-level writing specialists from each of the seven SJSU colleges. Their writing specialists have
met a rigorous GPA requirement, and they are well trained to assist all students at all levels within all disciplines to
become better writers. The Writing Center website is located at http://www.sjsu.edu/writingcenter/.

Additional Notes:

- We will make extensive use of the Canvas course management system
  (https://sjsu.instructure.com/courses/1357828) and the Piazza Q & A platform. Make sure that you adjust your
  settings in Canvas and Piazza, so you will get notifications in a way that you check frequently. You also may
  need a WiFi enabled device (smartphone, tablet, or laptop) to bring to lecture, and a laptop or tablet computer to
  use for exams. If you don’t have one of these devices, there are resources on campus that can loan you
  something appropriate. See: http://library.sjsu.edu/scs

- You will need to have access to Adafruit Feather M4 Express (https://www.adafruit.com/product/3857) board
  and a USB A – micro B data cable for homework assignments. You can buy a FM4E board from EduShields
during the first two weeks of class. If Adafruit is out of stock, check Mouser (https://tinyurl.com/y5x8476b),
Digikey (https://www.digikey.com/products/en?impart=3857&v=1528), or Evil Mad Scientist

- If you are going to be absent from class or lab, please give me a call, or send me an email as soon as you know
  that you will not be able to attend. Don’t just not show up!

- Reading assignments in Canvas should be completed prior to the lecture for the week in which the assignment is
  listed. In other words, read the assigned chapters before the next lecture! Doing so will help prepare you for
  lecture and will help you maximize your learning efficiency. It will also help you score well on any in-class
  quizzes on the readings. When you read, summarize the important points and jot down any questions that you
  have. Bring your questions with you to the lecture.

- See Canvas for auxiliary materials that we will use in lecture and that you would do well to bring with you to the
  lecture session. You can access the materials along with the lecture slides in the Modules area of the course shell
  in Canvas.

- Following each lecture, I highly recommend that you review any notes you took in lecture along with the notes
  that you took from reading. Read back through your notes, and fill in any gaps that you may have missed or that
  became clearer from the lecture. Write down any questions you have in the margins of your notes. Be sure to
  come to office hours or ask about your questions in class.

- Please make it a point to ask questions in class, on Piazza, or in office hours whenever you don’t understand
  something! If you don’t, then you are essentially paying tuition for nothing! The pace of this class is relatively
  fast, especially if you have little prior experience with electronics or computer programming, so don’t slack off.

- Start working on the project as soon as possible. The most common lament heard from students who fare poorly
  in the class is, “We should have started earlier on the term project.”

- Lab experiments are intended to be performed in a group of two students. The laboratory report is to be written
  individually. It is acceptable to work collaboratively with your lab partner or other students in the class on the
  lab report, but it is NOT acceptable to copy someone else’s report, in whole or in part. Examples of
  collaboration are: reviewing the data you gathered with your lab partner for consistency, jointly developing an
  outline of the key points to be included in the report, deciding together on the format and content of figures, etc.
  Examples of plagiarism are: copying and inserting sentences, paragraphs, or other text into your report that your
  lab partner or someone else wrote; copying figures or tables that your lab partner or someone else put together,
  etc. Software listings must be in machine readable form (not as an image).
