San José State University
School of Engineering / Department of Mechanical Engineering
ME-186, Introduction to Automotive Engineering, Section 1, Fall 2019

Course: ME 186 – Automotive Engineering
Course Code: 41180 section 1
Semester: Fall 2019
Prerequisites: ME 114, ME 130, ME 154.
Credit Units: 3 Seminar
Instructor: Kevin A. Sawyer, Ph.D., P.E.
Class Hours: Wednesday, 6:00-8:45 pm
Final Examination: Wednesday, December 11. 5:15-7:30
Class Location: Clark Building 234
Office Hours: Wednesday 4:00-6:00: By appointment.
Office: (408) 741-7051 x101
Cell/text: (408) 396-5523
Email: kevin.s@hsaengr.com

Course Description: Overview of automotive engineering fundamentals including powerplant, structures, suspension, steering, brakes, tires, and drive train. Application of engineering principles in automotive design and analysis. Introduction to alternative vehicle technologies. Use of mechanical engineering principles for automobile performance analysis.

Course Goals:
1. Learn automotive specific engineering principles
2. Learn basic automobile operational principles
3. Study traditional and advanced vehicle technologies
4. Apply engineering principles to automotive component performance analysis
5. Apply engineering principles to analyze automobile stability and handling

Student Learning Objectives:
1. The ability to identify various components of automotive vehicles
2. The ability to describe various automotive operational principles
3. The ability to calculate basic automotive performance parameters
4. The ability to describe automotive systems in terms of engineering models
5. The ability to apply mechanical engineering concepts in the automotive design processes

Course Learning Outcomes:
Upon successful completion of this course, students will be able to:
1. Describe and compute the basic thermodynamics of internal combustion engines
2. Compute vehicle dynamic behaviors such as cornering, braking and acceleration
3. Describe the operation and compute the behavior of automotive components such as gear trains, flexible couplings, clutches and brakes
4. Compute cornering forces at the tire and vehicle levels
Required Text/reading:

- PDF materials provided by instructor

Course Requirements and Assignments:

Success in this course is based on the expectations that the student will attempt and submit all homework assignments. Homework assignments are intended to support learning of automotive system fundamentals, and are also intended to prepare the student for the examinations. The student is expected to complete the term project, and submit original work. The student is expected to sit the midterm and final examinations.

If problems are not assigned from the texts, homework assignment will be emailed to the class in pdf format. Due date will be no less than 7 days from distribution or assignment in class.

The term project is defined as follows:

Select a topic related to automotive engineering that interests you. For example: Design and/or analysis for a component for the Formula SAE or Baja vehicles. Study of the handling characteristics of E-bikes. Dynamics and power usage of an electric scooter….

Submit your topic and proposal of final report content. The proposal shall identify the topic, state the purpose of effort, specify the steps required to produce the desired results and expected content of final report. Here is a simplistic example: I plan to design a new rear spoiler for the formula SAE vehicle. I will size the wing to achieve 200 pounds of downforce. I will provide CFD analysis of the pressure distributions and FEA of the wing and support structure.

Work on your project over the semester. Meet with the instructor if you need guidance or advice in order to complete the task.

A formal engineering report summarizing your efforts is due the last day of class.
Grading Information:

<table>
<thead>
<tr>
<th>Component</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Homework</td>
<td>20%</td>
</tr>
<tr>
<td>Project</td>
<td>20%</td>
</tr>
<tr>
<td>Midterm exam</td>
<td>30%</td>
</tr>
<tr>
<td>Final exam</td>
<td>30%</td>
</tr>
</tbody>
</table>

Homework must be submitted in hardcopy on the due date. Late homework will be accepted up to one week late with a penalty of 50% maximum credit. No exceptions. Homework solutions will be reviewed in class on the due date.

The term project score will be evaluated on the following criteria:

<table>
<thead>
<tr>
<th>Component</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Title, purpose and deliverables</td>
<td>10%</td>
</tr>
<tr>
<td>Problem definition and preparation for analysis</td>
<td>20%</td>
</tr>
<tr>
<td>Analysis</td>
<td>40%</td>
</tr>
<tr>
<td>Summary and conclusions</td>
<td>30%</td>
</tr>
</tbody>
</table>

Grades will be assigned per the following university recommended criteria based on a cumulative total of 100 points. Final semester grades will be assigned on the following percentage basis.

- A plus = 100 to 97%
- A = 96.9 to 94%
- A minus = 93.9 to 90%
- B plus = 89.9 to 87%
- B = 86.9 to 84%
- B minus = 83.9 to 80%
- C plus = 79.9 to 77%
- C = 76.9 to 74%
- C minus = 73.9 to 70%
- D plus = 69.9 to 67%
- D = 66.9 to 64%
- D minus = 63.9 to 60%
- F = 59.9 % or lower
### Tentative Course Topics and Schedule:

This schedule will change pending schedule availability of guests. Midterm day will not change.

<table>
<thead>
<tr>
<th>Week</th>
<th>Topic</th>

Classroom Protocol

Regular attendance and active participation are encouraged. Please attend to non-classroom related discussion and activity outside of the classroom.

Dropping and Adding

Students are responsible for understanding the policies and procedures about add/drop, grade forgiveness, etc. Refer to the current semester’s Catalog Policies section at http://info.sjsu.edu/static/catalog/policies.html. Add/drop deadlines can be found on the current academic calendar web page located at http://www.sjsu.edu/academic_programs/calendars/academic_calendar/. The Late Drop Policy is available at http://www.sjsu.edu/aars/policies/latedrops/policy/. Students should be aware of the current deadlines and penalties for dropping classes.

Information about the latest changes and news is available at the Advising Hub at http://www.sjsu.edu/advising/.

University Policies

Academic integrity

Your commitment as a student to learning is evidenced by your enrollment at San Jose State University. The University’s Academic Integrity policy, located at http://www.sjsu.edu/senate/S07-2.htm, requires you to be honest in all your academic course work. Faculty members are required to report all infractions to the office of Student Conduct and Ethical Development. The Student Conduct and Ethical Development website is available at http://www.sa.sjsu.edu/judicial_affairs/index.html.

Instances of academic dishonesty will not be tolerated. Cheating on exams or plagiarism (presenting the work of another as your own, or the use of another person’s ideas without giving proper credit) will result in a failing grade and sanctions by the University. For this class, all assignments are to be completed by the individual student unless otherwise specified. If you would like to include your assignment or any material you have submitted, or plan to submit for another class, please note that SJSU’s Academic Policy S07-2 requires approval of instructors.

Campus Policy in Compliance with the American Disabilities Act

If you need course adaptations or accommodations because of a disability, or if you need to make special arrangements in case the building must be evacuated, please make an appointment with me as soon as possible, or see me during office hours. Presidential Directive 97-03 requires that students with disabilities requesting accommodations must register with the Disability Resource Center (DRC) at http://www.drc.sjsu.edu/ to establish a record of their disability.

“Success in this course is based on the expectation that students will spend, for each unit of credit, a minimum of forty-five hours over the length of the course (normally 3 hours per unit per week with 1 of the hours used for lecture) for instruction or preparation/studying or course related activities including but not limited to internships, labs, clinical practica. Other course structures will have equivalent workload expectations as described in the syllabus.”
