

Megan C. Chang

Assistant Professor Megan Chang, Ph.D., OTR/L, earned her Ph.D. in Occupational Science, M.S. in Applied Biostatistics and Epidemiology, and M.A. in Occupational Therapy from the University of Southern California, and B.S. in Occupational Therapy

from the National Cheng Kung University in Taiwan. She completed a clinical training program and received certification in the Autism Diagnostic Observation Schedule (ADOS). Her research interests include using psychophysiological approaches to study sensory processing, emotion, and cognition as well as examining psychosocial and physiological risk factors associated with health-related behaviors and occupations in various populations. She has clinical experience in a variety of settings including her most recent work in the fields of physical dysfunction and pediatrics. She is a Statistical Analysis Software (SAS) programmer and has worked several years as a biostatistician. Inspired by her previous mentors, she is passionate about teaching future therapists not only to improve their skills but also to actively engage in research activities in order to collaboratively strengthen the knowledge base of Occupational Therapy.
