Course Description

Understand the judicial system and dispute resolution with emphasis on the role of law in purchasing, contracting and administering a business as it impacts the firm's constituencies and society as a whole.

In this course we will study the nature, function and application of the U.S. legal system as it applies to the modern business environment. There is no aspect of American business that is not affected by our legal system. After studying and understanding the basic concepts and structure of our legal system we will examine and analyze its role in the development and growth of business with an emphasis on ethics and business decision making. You do not have to be a lawyer to understand the fundamentals of our legal system and its influences in business. You are not expected to have a lawyer’s knowledge and understanding of the law at the end of this course but you should have a basic understanding of the legal structure and method of analysis that influences American business today.

In general, it is recommended that students begin by seeking clarification or discussing concerns with their instructor. If such conversation is not possible, or if it does not address the issue, it is recommended that the student contact the Department Chair as the next step.
