Senior Project: Design Documentation

The design documentation consist of the followings:
1. A 3-D CAD model of the finished product
2. Assembly or operating instructions if needed for its function
3. Exploded view if necessary
4. Detailed drawings of all the parts that you will manufacture
5. Vendor brochure or catalogue of all the parts that you purchase
6. Bill of Materials
7. Photographs or sketches if applicable
8. A brief description of the product.
