Literary Event Responses

- Give a brief summary of the reading/conversation including the titles of works the author reads from. (their books) Include your specific response to examples of what they read.
- Discuss 2 or 3 questions that the author answers that reveal something about her/him as a writer, perhaps where their ideas come from or what their writing practice is. What does the author mention that surprises you and why? What question were you glad someone asked? Are you left wondering anything about the author, their writing or writing life? Can you apply anything from their experience to your own? (~500 words).
- Take notes below. **Please type an essay response with formal heading as usual.**
