QUICK FACTS ABOUT SAN JOSE STATE UNIVERSITY

- Largest university in a downtown area in California.
- 88 acres in city center.
- 40,000 students, faculty and staff.
- 12th most diverse public university in the U.S.
- 60% of students get to campus by means other than single occupant vehicle.
- 4,200 students live on campus, 12 thousand live within 5 miles.
- Over 250,000 alumni; two thirds live in the Bay Area.
Campus Village Phase 2

A new 850 bed student housing is being proposed at the corner of 9th Street and Peseo de San Carlos. The new building will house up to 850 beds, common study rooms, lounge, multi-purpose room, recreation space, and other support spaces. It is expected to be a 10 story high rise building.

- Status - Complete
- Total Project Cost: $126,000,000
Student Recreation and Aquatic Center

The proposed project will have additional gymnasium, weight and fitness center, exercise rooms, rock climbing wall, sports club organizations, and competition and recreation pools with support spaces. The project site is located at south east corner of 7th Street and San Carlos across from the existing Event Center.

- Status: Construction
- Estimated Construction Duration: 8/2016 - 12/2018
- Total Project Cost: $139,000,000
Interdisciplinary Science Building

San Jose State University will create a state of the art science facility focused on faculty-led student research. The project will construct a new building of 160,000 gross square feet accommodating teaching labs, research labs, faculty offices, dean's suite and interdisciplinary spaces. The project location is being proposed in the south west quadrant of campus north of Duncan Hall.

- Status: Schematic Design
- Anticipated Construction Duration: January 2019 - June 2021
- Total Project Cost: $147,518,000
THE PROMISE OF AMERICA’S PREMIER METROPOLITAN UNIVERSITY

• Reach beyond our borders.
• Form enduring partnerships that build a better community for everyone.

SAN JOSE STATE IS POWERING SILICON VALLEY

- Top provider of talent in engineering, education, business and finance.
- More Apple employees come from the San Jose State than any other University.
THE UNIVERSITY ALSO POWERS DOWNTOWN

- Downtown’s biggest employer, largest land owner, longest-term economic stimulant, and most prolific developer.
- With tremendous local economic development impact.
San Jose State University: Integrate Downtown and Campus

Overall, SPUR supports the university’s general campus planning. Our goal for this district is to encourage more downtown residents and workers to use SJSU and to draw more of the dynamism of SJSU onto the streets of downtown.

Big Idea #3

Promote a larger area of Central San Jose, with downtown as its core.
SPUR’S CENTRAL SAN JOSE CONCEPT

Defining Central San Jose
Neighborhoods Less Than 30 Minutes From Downtown on Local Transit

While small in its own, downtown San Jose’s prominence and potential comes in part from its proximity to other centers. Strengthening local transit and bike access to historic and walkable neighborhoods like Willow Glen and Naglee Park, shopping destinations like Santana Row and job centers along North First Street will make these places assets, not competition, for downtown.
