Course Description
This seminar is designed to facilitate the transition to the university smoothly with a view to an increased
understanding of one's cultural identity; and exploring mechanisms and consequences of prejudice and
discrimination in American cultural groups. GE Area: E
Prerequisite: First term freshmen only.
Note: All courses with a 'Q' suffix are designated as First Year Experience courses.

**Specific Course Description:**

Transition from high school to the college can be full of challenges and choices. In high school
everything was structured and familiar; students were clearly told what exactly was required of them. Now in
college they are faced with the novel task of making choices for themselves. This seminar course is designed to
facilitate this transition smoothly with a view to an increased understanding of one’s cultural identity; provide a
forum to discuss and better understand cultural differences; explore the mechanisms and consequences of
prejudice, oppression, and discrimination in American cultural groups; and to explore personal beliefs about
human differences.

This class aims at sensitizing students to recognize and respect the role of human diversity amongst us. Students will be encouraged to examine the various factors that are responsible for the development of stereotypes, prejudice, and discrimination. Students will also examine the psychological and human developmental theories as they relate to one’s development across the life-span. The role of physiological development in human development will be one of the themes of the course. Ethnicity, sexual orientation, gender, social class, and disability will also be examined. Lastly, students are expected to become culturally aware of their own values, biases and assumptions about human behavior, especially as they apply to future interactions with diverse professionals and persons in today’s multicultural society.

The class will combine discussion, didactic, and experiential exercises addressing these issues. The emphasis
of this course will be on developing an understanding of multicultural populations and the psychology of oppression - including exploration of socio-cultural and personal barriers to a more in-depth understanding of one’s personal similarities and differences in today’s diverse environment.

**Introduction to FYE**

University-level study is different from what you experienced in high school. The First Year Experience
course (FYE) is designed to help make your transition into college a success by helping you develop the skills
and attitudes needed for the intellectual engagement and challenge of in-depth university-level study.
Discovery, research, critical thinking, written work, attention to the rich cultural diversity of the campus, and
active discussion will be key parts of this FYE course. Enrollment in FYE courses is limited to a small number
of students because these courses are intended to be highly interactive and allow you to easily interact with your
professor and fellow students. FYE courses explore topics and issues from an interdisciplinary focus to show
how interesting and important ideas can be viewed from different perspectives. The FYE course is intended to
introduce you to academic and co-curricular opportunities and expectations at SJSU, combining intellectual
challenge with support.

Hence the overall goals of this FYE course are to help students to:

- make a successful academic & personal transition to the university;
- become engaged in the curricular and co-curricular life of the university;
