

CSU Statewide Senate Representative on the Executive Committee

Statement of Interests and Goals

As the statewide academic senator on the executive committee it is my goal to inform the president and his cabinet as well as the local senate leadership about the deliberations and resolutions of the statewide academic senate (ASCSU). I will also report on activities and plans of the Chancellor's Office, as related in a variety of reports at each statewide academic senate meeting.

It is also the responsibility of the statewide academic senator on the executive committee to communicate the activities of the statewide academic senate to the local senate during their meetings (a regular item on the agenda) and via email through the listserver.

Generally speaking, the designated statewide academic senator functions as the primary communication link between local and systemwide entities of shared governance.

Customarily, the three statewide senators have served on the executive committee in rotation.
