San José State University
Department of Sociology and Interdisciplinary Social Science
SOCI 15: Statistical Applications in the Social Sciences, Section 3
Spring 2018

Course and Contact Information

Instructor: Jose Bautista
Office Location: DMH 216
Telephone: (408) 741-2492
Email: jose.bautista@sjsu.edu
Office Hours: Monday 5:00 – 6:00 PM
Class Days/Time: Monday 6:00 – 8:45 PM
Classroom: HGH 122

Course Description

Information is all around us. Knowing how to make sense of it is not only important to understand our world, but is also a valuable skill to have in other classes that you take, and any career you pursue. This course is an introduction to statistical applications. We will learn ways to summarize and present data, including measures of central tendency and variation. We will also learn how to use probability and sampling distributions to test hypotheses with a variety of inferential tests like z-tests, t-tests and ANOVAs to compare sample means, and tests of association like Chi-square and Pearson’s correlation.

Prerequisites

Satisfaction of the ELM requirement. Since SOCI 15 meets the mathematical concepts G.E. requirement (Area B4), you must have passed the ELM placement test (or have been exempted from it) before enrolling in the course. Instructors cannot waive this requirement. Failure to meet this prerequisite will result in University canceling your enrollment in the course and denying credit regardless of any grade earned.

GE Category

Core G.E. Area B4 Mathematical Concepts. Please note that only a C or better in the course satisfies the G.E. requirement. Grades of C and below do not. Semester grades of C to D- are passing and earn three units credit, but they do not satisfy the Area B4 Mathematical Concepts requirement.

Course Goals and Learning Objectives

The student learning and content goals for Area B4 courses include the following (1-6):

1. Using mathematical methods to solve quantitative problems. Throughout the course, we will use basic mathematical operations and a calculator to solve statistical problems. You should be familiar with basic algebraic operations as we will use statistical formulas to solve statistical problems. Test items will typically
include multiple choice questions, quantitative problems requiring calculations, and short answer word problems.

2. Using mathematics to solve real life problems. Practice problems, homework problems, and test questions will reflect true-to-life situations and contemporary events.

3. Arriving at conclusions based upon numerical and graphical data. Students will gain familiarity with the organization and representation of quantitative data in various forms. Students will learn to read and interpret statistical output including tables, graphs, rates, percentages, and measures of central tendency and spread.

4. Applying mathematical concepts in one or more areas. After covering introductory concepts and procedures, the course will focus on probability and statistical inference. These concepts and methods are central to statistical analysis. By applying statistical inference, students will see how analytical techniques underscore many of the claims that they learn in Sociology courses.

5. Incorporating issues of diversity. Classroom examples and test items will frequently deal with issues of diversity. Expect examples that incorporate variations or diversities of race, ethnicity, national origin, religion, sex, physical abilities, age, marital status, citizenship, economic levels, and sexual orientation.

6. Writing requirements (minimum 500 words): In clear and concise language, you will be interpreting your results both in assignments and when responding to questions on your exams. Your writing skills are important. The thoroughness of your explanations, your coherence and your conciseness will be considered in evaluating this part of your work.

Required Text and Materials

Textbook

ESSENTIALS OF SOCIAL STATISTICS FOR A DIVERSE SOCIETY
Author: LEON-GUERRERO
ISBN: 9781483359496
Edition/Copyright: 2nd / 2015
Publisher: SAGE

Materials

- You will want to download and print worksheets from Canvas, so access to the web, a computer and a printer is recommended.
- Calculator (should be able to do square roots, and you should be comfortable using it). Calculators on cell phones, smart phones, tablets or computers are not allowed.
- Scantron (882) forms.

Course Web Page and MYSJSU Messaging

Course materials such as syllabus, handouts, notes, assignment instructions, etc. can be found on Canvas. You are responsible for regularly checking the web site to learn of any updates.

Course Requirements and Assignments

SJSU classes are designed such that in order to be successful, it is expected that students will spend a minimum of forty-five hours for each unit of credit (normally three hours per unit per week), including preparing for class,
participating in course activities, completing assignments, and so on. More details about student workload can be found in University Policy S12-3 at http://www.sjsu.edu/senate/docs/S12-3.pdf.

**Determination of Grades**

<table>
<thead>
<tr>
<th>Activity</th>
<th>Points</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>3 Exams 100 pts/ea.</td>
<td>300</td>
<td>(33%)</td>
</tr>
<tr>
<td>Lowest Exam score</td>
<td>-100</td>
<td></td>
</tr>
<tr>
<td>11 Quizzes 20 pts./ea.</td>
<td>220</td>
<td>(33%)</td>
</tr>
<tr>
<td>Lowest Quiz score</td>
<td>-20</td>
<td></td>
</tr>
<tr>
<td>Final Exam</td>
<td>200</td>
<td>(33%)</td>
</tr>
<tr>
<td><strong>TOTAL</strong></td>
<td><strong>600</strong></td>
<td></td>
</tr>
</tbody>
</table>

90% (540 points) or above gets an A  
80% (480 points) or above gets an B  
70% (420 points) or above gets an C  
60% (360 points) or above gets an D  
< 60% (< 540 points) gets an F

Plus or minus (+/-) grades may be given at instructor’s discretion for borderline grades.

Extra credit opportunities are usually available as a part of the regular midterm exams.

Exams: Three exams. Lowest score is dropped. As a general rule, the examinations will take place during the last 2 hours of the class period in which they are scheduled. Each exam is worth 100 points.

**Exam 1 (Chapters 1-4): 100 points**
- The Research Process
- Measurement Scales
- Frequency Distributions
- Proportions and Percentages
- Cumulative Distributions
- Rates
- Pie Charts
- Bar Graphs
- Histograms
- Line Graphs
- The Mode
- The Median
- The Mean
- The Shape of the Distributions
- The Range
- The Interquartile Range
- Variance
- Standard Deviation
Exam 2 (Chapters 5, 6 & 8): 100 points
- The Normal Distribution
- Standard (Z) Scores
- The Standard Normal Distribution
- The Standard Normal Table
- Transforming Proportions (or Percentages) Into Z Scores
- The Concept of the Sampling Distribution
- The Sampling Distribution of the Mean
- The Central Limit Theorem
- Assumptions of Statistical Hypothesis Testing
- Stating the Research and Null Hypotheses
- Probability Values and Alpha
- Hypothesis Testing
- Errors in Hypothesis Testing
- Z-tests

Exam 3 (Chapters 8-9): 100 points
- T-test for one sample
- T-test for independent samples
- T-test for dependent samples
- Bivariate Tables
- Chi-Square

Quizzes: Eleven quizzes. Lowest score is dropped. These will be online, and you will have a week to do each of them. Each quiz is worth 20 points.

<table>

<td>Chapter 11</td>
<td>5/8</td>
<td>5/13</td>
</tr>
</tbody>
</table>

Final Exam: About 50% comprehensive, and worth twice as much as the midterms. You will have the complete Final Examination period available to complete the final exam. Final exam is worth 200 points.

Final Exam (Review plus Chapters 10-11): 200 points
- Topics covered in exams 1-3
- One-way Analysis of Variance
- Regression
Course Policies and Expectations

I am committed to your success in this course, but it is your responsibility to keep up with the readings and assignments, to ask questions in class or during office hours if you don’t understand the material, and to come to class fully prepared. As the student, it is your responsibility to:

- Be in class. Attendance is required in this class. If you do not attend class, it is your responsibility to make up the work missed.

- Come to class prepared by having completed all of the assigned reading, and with the materials you will need, including a calculator and any handouts from Canvas.

- Do not use any electronics in class besides a regular calculator.

- Make sure that your work is your own.

- See me if you need help. If my office hours are not convenient, we can probably find a time that will work for us. The sooner you seek help, the less far behind you will get.

- Understand when you may drop this course. Refer to the current semester’s Catalog Policies section at http://info.sjsu.edu/static/catalog/policies.html. Add/drop deadlines can be found on the current academic year calendars document on the Academic Calendars webpage at http://www.sjsu.edu/provost/services/academic_calendars/. The Late Drop Policy is available at http://www.sjsu.edu/aars/policies/latedrops. Students should be aware of the current deadlines and penalties for dropping classes.

- Inform me of any accommodations needed. If you have a documented disability and are in need of course adaptations and/or accommodations, please contact me as soon as possible. Presidential Directive 97-03 at http://www.sjsu.edu/president/docs/directives/PD_1997-03.pdf requires that students with disabilities requesting accommodations must register with the Accessible Education Center (AEC) at http://www.sjsu.edu/aec to establish a record of their disability. If you think you might or know you will require alternative testing arrangements, you must register with the AEC at the beginning of the semester.

- Commit to Integrity As a student in this course (and at this university) you are expected to maintain high degrees of professionalism and integrity both in and out of the classroom. The University Academic Integrity Policy S07-2 at http://www.sjsu.edu/senate/docs/S07-2.pdf requires you to be honest in all your academic course work. Faculty members are required to report all infractions to the office of Student Conduct and Ethical Development. The Student Conduct and Ethical Development website is available at http://www.sjsu.edu/studentconduct/. Instances of academic dishonesty will not be tolerated. Cheating on exams or plagiarism (presenting the work of another as your own, or the use of another person’s ideas without giving proper credit) will result in a failing grade and sanctions by the University.

- Obtain consent to make recordings in class. Common courtesy and professional behavior dictate that you notify someone when you are recording him/her. You must obtain the instructor’s permission to make audio or video recordings in this class. Such permission allows the recordings to be used for your
private, study purposes only. The recordings are the intellectual property of the instructor; you have not been given any rights to reproduce or distribute the material.

- Agree not to share course materials. Course material developed by the instructor is the intellectual property of the instructor and cannot be shared publicly without their approval. You may not publicly share or upload instructor generated material for this course such as exam questions, lecture notes, or homework solutions without instructor consent.

University Policies
Per University Policy S16-9, university-wide policy information relevant to all courses, such as academic integrity, accommodations, etc. will be available on Office of Graduate and Undergraduate Programs’ Syllabus Information web page at http://www.sjsu.edu/gup/syllabusinfo/”

SOCI 15 / Introduction to Statistics, Spring, 2018, Course Schedule
