

## Chemistry BA/BS Student Learning Objectives Fall 2007 through Fall 2010

Upon graduation, students obtaining a baccalaureate chemistry (B.S. or B.A) degree should be able to:

demonstrate a general familiarity with the content and concepts and to solve problems in the following areas of chemistry: analytical, biochemistry, inorganic, organic and physical.

work safely in a laboratory environment.

use computer technology in applications in chemistry.

effectively communicate science, both orally and in writing.

work both in teams and independently.
