Visual Verification Summary

Total Files Requiring Visual Verification: 127
Total Files Not Requiring Visual Verification: 7
Percentage Requiring Visual Verification: 94.776%
Percentage Not Requiring Visual Verification: 5.224%

(Note: see below for information regarding this summary.)

Files Requiring Visual Verification are files containing HTML elements, identified through automated checks, that require visual verification to determine accessibility. All files should be verified visually, in addition to any automated remediation, to be sure of the compliance to all checkpoints.
