Please answer the following questions in the spaces provided.

What key lessons were learned, techniques developed, or other generalizable repair practices (technical or organizational) were developed?

Working toward web accessibility will be a complicated process, requiring time for repairs and coordinating cooperation between various levels of the organization.

For pages or problems that cannot be fixed immediately, what current actions (technical or organizational) are planned to provide equally effective access to the page content?

My website uses the university template, I will need to be provided with a new template before I may make changes.

For pages or problems that cannot be fixed immediately, how will a long-term fix be accomplished, who will need to do it (for example, a product vendor), and what is your estimated time and cost of repair or replacement?

I will need to transfer at the information from the old template to the new template.
