

Please complete this form for each critical-list Web page you evaluated and/or repaired.

Web page URL:

For this Web page, what were the top three accessibility issues you addressed, and how much time and effort did you spend on resolving them?

Issue 1

Did fixing this issue also fix other pages?

Time spent

Difficulty

Issue 2

Did fixing this issue also fix other pages?

Time spent

Difficulty

Issue 3

Did fixing this issue also fix other pages?

Time spent

Difficulty

What is the estimated time and effort required to completely fix your entire Website for accessibility?

Time (person-weeks)

Difficulty

Will you need additional assistance from any of the following in order to completely fix your Website?

Type of assistance:

Other:

Estimated cost associated with assistance:

What future workshops might you be interested in attending regarding creating accessible documents?

Microsoft Word Microsoft Powerpoint PDF Creation

HTML Basics

Accessible Web forms

Other:

Are you using a content management system to manage your Website?

Yes

No

If yes, which one?

Please answer the following questions in the spaces provided.

What key lessons were learned, techniques developed, or other generalizable repair practices (technical or organizational) were developed?

Changed links in the content to be more descriptive. Changed colors used.

For pages or problems that cannot be fixed immediately, what current actions (technical or organizational) are planned to provide equally effective access to the page content?

We are using the current university template, which is not accessible. When we upgrade to the new accessible university template, then our entire site will be accessible (except for documents). We are doing a redesign at the same time. We need to create new accessible templates for our documents, then train all the staff that write our documents so they can make all our documents accessible. This will be a long process as we have a lot of documents.

For pages or problems that cannot be fixed immediately, how will a long-term fix be accomplished, who will need to do it (for example, a product vendor), and what is your estimated time and cost of repair or replacement?

PeopleSoft is not currently accessible and we do not have the capability of making it accessible. We think this issue should be resolved between baseline and the Chancellor's Office so that an accessible PeopleSoft can be released to all campuses.

When the form is completed, click the "Print Form" button below, select "Adobe PDF" as the printer, and name the file *ati plus worksheet plus your url* (without the www).

Example: *ati_worksheet_sjsu_edu_hr.pdf*
