

# Research Experience for Undergraduates: Lowering the Carbon Footprint through Research in Propulsion and Power Generation

**The Pennsylvania State University**  
**May 30 – August 4, 2023**

<https://sites.psu.edu/powerpropulsionreu/>

Experience next-generation propulsion and power research with leading academic experts at this Research Experience for Undergraduates site funded by the National Science Foundation (NSF), the Air Force Office for Scientific Research (AFOSR), and the National Aeronautics and Space Administration (NASA). Join a team of over 15 undergraduate researchers working in a range of disciplines, including additive manufacturing, turbomachinery, low-carbon energy systems, heat transfer, and combustion. In this program, students will regularly network with professionals from across the propulsion and power-generation industry and develop professional skills for successful careers.

For more information about the program and how to apply, visit our website at:
