Course Format

Lecture and Drawing Analysis. Activity – twice a week.

Course Description

This course, Beginning Drawing, is an introduction to the essential formal and creative aspects of drawing.

Each student will gain a better understanding of the nature and importance of drawing through the investigation of techniques, medias, and basic inherent principles of artmaking. This course is based upon the students ability to learn to begin to see in new ways, and create visual responses through effective analysis and creative inspiration.

The student will analyze their growth through an ongoing process, and by understanding and

applying the basic elements of drawing: line, shape, space, value, form, volume, texture, pattern, and composition.

In addition, these basic and combined foundations of drawing will lend themselves to a better appreciation of the processes of artmaking, and will enable the student to begin to use them as different forms of expression. Each class will begin with a presentation concerning one or all of these elements.

The sequential assignments over the course of the semester will culminate in a final drawing problem at the end of the semester, which should reflect the individual student's progress and creative momentum up to that point.

Course Goals

Course projects are designed to familiarize students with the basic mechanics of traditional drawing practice and media. Students will learn various drawing techniques in order to represent still-life objects in a convincing manner. Technical demonstrations are designed to enable students to record their visual responses to a variety of subjects. The broader objective is to introduce an awareness of historical drawing approaches with an emphasis on 20th century masters.

Course Goals and Student Learning Objectives

Upon successful completion of this course, students will be able to:

LO 1: Create works in a wide range of media and materials, including but not limited to; charcoal, pencil and graphite, conté crayon, ink, various drawing tools, and a variety of papers that are instrumental in making drawing successful.

LO 2: See and visually comprehend, specifically in relation to the process of drawing.

LO 3: Understand and apply pictorial principles, including: the picture plane, compositional frameworks, and the overall design of pictorial space.

LO 4: Demonstrate an awareness and sensitivity to the nature and importance of line, weight, form, volume, texture and pattern.

LO 5: Discern the challenging applications of tone and value and demonstrate sensitivity to issues of light and space.

LO 6: Employ drawing as an investigative process, in a variety of applications, and communicate their experiences through the act of drawing and practice.

Vocabulary for Drawing 1

Cast shadow – Shadows thrown by objects onto adjacent planes, or a dark shape, created by the absence of light, that results from placement of an opaque object in the path of the light source.

Chiaroscuro – A continuous gradation of value to create the illusion of three-dimensional form. Chiaroscuro, which combines Italian words chiaro (light) and oscuro (dark) involves systematic changes of value. The elements of the system are highlighted, light, shadow, reflected light, and cast shadow.

Composition – The combination of multiple parts to create a harmonious whole.

Concept – A general notion or idea. An idea of something formed by mentally combining characteristics or particulars. A construct.

Content – Something that is expressed through some medium, as speech, or any of the various arts. Significance or profundity

Contour line- A line that describes the edges of a form and suggests three-dimensional volume.

Contrast- The degree of difference between compositional parts, or between one image and another.

Cross-contour – Multiple, curving, parallel lines running over the surface of an object horizontally and or/vertically that describe its surface configuration topographically, as in

mapping.

Form – Every object has a specific three-dimensional characteristic that consists of form. The simplest forms are spheres, cylinders, cubes, and pyramids.

Gradation – Shading created through the gradation of grays can be used to suggest three-dimensional form.

Highlights – The lightest value present on the surface of an illuminated form, which tends to occur on very smooth and or shiny surfaces. They are the intense spots of light that appear on the crest of the surface facing the light source.

Horizon line – In linear perspective, the line on which all vanishing points are positioned. More accurately described as the eye line or eye level.

Light – A broad intermediate value between the more defined areas of highlight and the core of the shadow.

One point perspective – A form of linear perspective in which the lines receding into space converge at a single vanishing point on the eye level or horizon line.

Perspective – A graphic system used to create the illusion of space on a two-dimensional surface.

Picture plane – The flat surface on which an artist creates a pictorial image.

Proportion – A comparative relationship between the parts to a whole. For example, in figure drawing, the model's head is often compared to the overall height of the body.

below the eye level. Used when the picture plane must be tilted to encompass an object placed above or below the eye level.

Value – The lightness or darkness of a color. The relative lightness or darkness of a surface.

Value scale – A range of grays that are presented in mathematically consistent sequence.

Vanishing Point – Denotes degrees of light and dark. In linear perspective, the point or points on the eye level at which parallel lines appear to converge.

Classroom Protocol

Attendance

Attendance is mandatory and extremely important. Maintaining a level of seriousness and completing the course work is instrumental to success in the course.

Cell Phones: Students will turn their cell phones off or put them on vibrate mode while in class. They **will not** answer their phones in class.

IPODS and MP3 Players: Are allowed in class while drawing, but not during any lectures or critiques.

Requirements

Regular attendance and work during class time, along with participation in class critiques and discussions, is mandatory. All assignments must be handed in on time. Any assignments handed in late will be graded down a whole grade.

(Note: According to University policy F69-24, "Students attend all meetings of their classes, not only because they are responsible for material discussed therein, but because active participation is frequently essential to insure maximum benefit for all members of the class. Attendance per shall not be used as a criterion for grading.")

Homework requirements

Example: Homework is due on Tuesday, but if turned in on Thursday; the best grade a student can receive is a “B”. Any projects handed in after the week they are due will be considered either incomplete, or will receive an “F”

Grading

Grades will be determined by the following percentages:
