Course Description

ARTH-DSGD 176A presents a thematic and chronological examination of major historical trends of graphic design and its reception. It uses the slide lecture format to contextualize main historical, technological, and theoretical concerns that influenced individuals and movements in graphic design.

Course Goals

The study of the history of graphic design asks you to pay attention and to look closely at works of design. It also asks you to think, speak and write thoughtfully and affectively about your visual experience. Instruction will involve the following: Slide lecture, class discussion, individual and group projects and presentations. It may also include videos, visits to local sites, museums and/or exhibitions, student peer evaluation/writing workshops, and attendance of Department of Art and Art History or other lectures. The course textbook is

supplemented by primary and secondary source materials including manifestoes, interviews, critical essays and popular press articles posted to Canvas and available through specified King Library article databases.

Study Guides for review and self-guided study and key images from lecture will be available on Canvas within seven days after the completion of related lectures. Lectures will develop these materials and questions based on them will be presented on course exams. You will:

- Conduct self-directed study of basic terminology and concepts using required course readings and Study Guides available on the Course Website.
- Memorize terms, names, dates, and historical facts about iconic works of graphic design;
- Recognize the dominant period-styles of graphic design through the characteristics of each one;
- Use required readings, lecture notes and Study Guides to increase knowledge of the concepts and contexts of iconic works, major designers and key movements of graphic design;
- Complete a written research project on an approved graphic design innovation and/or designer; papers will require independent research, submission of a thesis topic and bibliography, a graded draft, strategic problem solving, peer evaluation, and demonstrated mastery of design terminology;
- Translate your visual perceptions of works of graphic design into papers and essays;
- Develop critical thinking skills by engaging in in-class discussion and writing about graphic design;
- Develop your verbal communication skills through in-class discussion and in-class presentations; and
- Write clearly, effectively, and critically using terminology appropriate to the history of graphic design.

Course Learning Outcomes (CLO)

The objective of this course is for students to acquire a broad perspective on the changing technologies, cultural ideals, and popular tastes that have historically influenced design as a whole. A secondary goal is to develop the communication skills necessary for translating your visual perceptions into words and, more generally, to securing your academic and professional success. Upon successful completion of this course, students will be able to:

- Master basic terminology, concepts and issues in graphic design;
- Gain knowledge of the work and ideas of major graphic designers and movements;
- Gain knowledge of the history and context of graphic design innovations, knowledge which will in turn enable strategic problem solving and encourage coherent design methodologies;
- Develop and/or reinforce skills in communicating about graphic design;
- Develop skills in translating visual perceptions into verbal and written communication;
- Develop skills in thinking critically about graphic design; and
- Write clearly, effectively, and critically using terminology appropriate to the history of design.

Note: As in any university course, ARTH-DSGD 176A does not give you these competencies, but rather creates an opportunity for you to work toward achieving them.

Library Liaison

Gareth Scott: gareth.scott@sjsu.edu

SJSU classes are designed such that in order to be successful, it is expected that students will spend a minimum of forty-five hours for each unit of credit (normally three hours per unit per week), including preparing for class, participating in course activities, completing assignments, and so on. More details about student workload can be found in University Policy S12-3 at: <http://www.sjsu.edu/senate/docs/S12-3.pdf>.

Course Requirements and Assignments

There will be one take-home exam, a midterm, an individual research paper submission; and a group project (presentation) and a final exam. Papers will be subject to peer review prior to submission. **Grading criteria** for all writing assignments is posted to the Course Website, as are writing guides intended to help with structure and citation formats. All papers will be evaluated and returned with instructor comments intended to improve future writing assignments;

- All drafts and papers will require scholarly research as well as analytical and affective responses to works of design. Insomuch as is possible, they will require observing, describing and discussing actual examples of design (as opposed to reproductions);
- **Required paper formats.** Type all written assignments with one-inch margins and a 12-point font. Use **Chicago Style citation formats**. 1.15 space, use page numbers, and put your name, title and assignment number on a cover page (see Course Website writing guides for example).

Students are urged to remain current by taking effective lecture notes and researching and writing out answers to the on-line Study Guides as they are posted. It is recommended that students form study groups outside of class as this is a highly effective means of assimilating information into knowledge.

Midterm and Final Examination

Material covered on exams will derive from class lectures and assigned readings from the course textbook, assigned readings, and ARTH-DSGD 176A Course Website. **Quiz and exam format** consist of a **combination of slide identification and analysis of design works, comparisons of design works, terminology, multiple choice and/or short essay answer questions.** Both the Midterm and Final will follow the same format.

Classroom Protocol

- Attendance and active participation are essential to your success in this course as they represent your opportunity to apply what you have learned, to articulate your ideas clearly and effectively, to develop analytical and critical thinking about design, and to learn about additional perspectives on our topics of study. Please arrive punctually with all required materials and stay for the entire class. Discussion will typically center on images shown in class and not all of these will be available in the texts.
- To prevent classroom distractions that interfere with student learning, students are asked to turn off cell phones and to limit laptop use to taking notes. Students who use their computers or other electronic devices for non-classroom related activities, or who hold private conversations during lectures or other presentations, will be asked to leave class and may be referred to Judicial Affairs;
- Papers must be original to this class (no “recycling”), meet all assignment requirements, and provide proper in-text source citations for all sources used (including textbook) for credit. All final papers must be submitted with draft versions for credit. **No late papers accepted without valid documentation;**
- Group assignments and in-class activities require the full participation of all group members. Documentation of active and legitimate participation is required from each member in order to receive the overall group grade. Absence of any or all supporting materials will result in a group grade of “0”; and
- **Papers copied in whole or in part from Internet sources will receive a grade of “0.” In addition, and per University protocol, all incidents of plagiarism will be reported to the Office of Judicial Affairs. A second offense in this or any other class will result in administrative disciplinary action, which can potentially involve expulsion.
