Course Format

Lecture and Drawing Analysis. Activity – twice a week.

Course Description

This course, Drawing 1, is an introduction to the essential formal and creative aspects of

drawing.

Each student will gain a better understanding of the nature and importance of drawing through the investigation of techniques, medias, and basic inherent principles of through their practice, regarding the nature of drawing. This course is based upon the student's ability to learn to begin to see in new ways and create visual responses through effective analysis and creative inspiration.

The student will analyze their growth through an ongoing process, and by understanding and applying the basic elements of drawing: line, shape, space, value, form, volume, texture, pattern, and composition.

In addition, these basic and combined foundations of drawing will lend themselves to a better appreciation of the processes of artmaking] and will enable the student to begin to use them as different forms of expression. Each class will begin with a presentation concerning one or all of these elements.

The sequential assignments over the course of the semester will culminate in a final drawing problem at the end of the semester, which should reflect the individual student's progress and creative momentum up to that point.

Course Goals

Course projects are designed to familiarize students with the basic mechanics of traditional drawing practice and media. Students will learn various drawing techniques in order to represent still-life objects in a convincing manner. Technical demonstrations are designed to enable students to record their visual responses to a variety of subjects. The broader objective is to introduce an awareness of historical drawing approaches with an emphasis on 20^t h century masters.

Course Goals and Student Learning Objectives

Upon successful completion of this course, students will be able to:

LO 1: Create works in a wide range of media and materials, including but not limited to; charcoal, pencil and graphite, ink, various drawing tools, and a variety of papers that are instrumental in making drawing successful.

LO 2: See and visually comprehend, specifically in relation to the process of drawing.

LO 3: Understand and apply pictorial principles, including: the picture plane, compositional frameworks, and the overall design of pictorial space.

LO 4: Demonstrate an awareness and sensitivity to the nature and importance of line, weight, form, volume, texture and pattern.

LO 5: Discern the challenging applications of tone and value and demonstrate sensitivity to issues of light and space.

LO 6: Employ drawing as an investigative process, in a variety of applications, and communicate their experiences through the act of drawing and practice.

Vocabulary for Drawing 1

Cast shadow – Shadows thrown by objects onto adjacent planes, or a dark shape, created by the absence of light, that results from placement of an opaque object in the path of the light source.

Chiaroscuro – A continuous gradation of value to create the illusion of three-dimensional form. Chiaroscuro, which combines Italian words chiaro (light) and oscuro (dark) involves systematic changes of value. The elements of the system are highlight, light, shadow, reflected light, and cast shadow.

Composition – The combination of multiple parts to create a harmonious whole.

Concept – A general notion or idea. An idea of something formed by mentally combining characteristics or particulars. A construct.

Content – Something that is expressed through some medium, as speech, or any of the various arts. Significance or profundity

Contour line- A line that describes the edges of a form and suggests three-dimensional volume.

Contrast- The degree of difference between compositional parts, or between one image and another.

Cross-contour – Multiple, curving, parallel lines running over the surface of an object horizontally and or/vertically that describe its surface configuration topographically, as in mapping.

Form – Every object has a specific three-dimensional characteristic that consists of form. The simplest forms are spheres, cylinders, cubes, and pyramids.

Gradation – Shading created through the gradation of grays can be used to suggest three-dimensional form.

Highlights – The lightest value present on the surface of an illuminated form, which tends to occur on very smooth and or shiny surfaces. They are the intense spots of light that appear on the crest of the surface facing the light source.

Horizon line – In linear perspective, the line on which all vanishing points are positioned. More accurately described as the eye line or eye level.

Light – A broad intermediate value between the more defined areas of highlight and the core of the shadow.

One point perspective – A form of linear perspective in which the lines receding into space converge at a single vanishing point on the eye level or horizon line.

Perspective – A graphic system used to create the illusion of space on a two-dimensional surface.

Picture plane – The flat surface on which an artist creates a pictorial image.

Proportion – A comparative relationship between the parts to a whole. For example, in figure drawing, the model's head is often compared to the overall height of the body.

below the eye level. Used when the picture plane must be tilted to encompass an object placed above or below the eye level.

Value – The lightness or darkness of a color. The relative lightness or darkness of a surface.

Value scale – A range of grays that are presented in mathematically consistent sequence.

Vanishing Point – Denotes degrees of light and dark. In linear perspective, the point or points on the eye level at which parallel lines appear to converge.

Classroom Protocol

Attendance

Online Attendance via Zoom is mandatory and extremely important. Maintaining a level of seriousness and completing the course work is instrumental to success in the course.

Online Class Protocol

All classes will meet via Zoom during the regular class hours accessible via the Zoom links on Canvas. Questions and comments may be entered anytime during the session in the “chat” box. Students are asked to remain on mute until called on to speak. Students wishing to speak should use the “hand raise” icon in the participant list. It is optional to have video on. However, anyone with video on should be seated and properly dressed for classroom attendance. Students are asked to arrive punctually for the Zoom classes. Late arrivals may have to wait a few minutes before entering the Zoom session as late admission requires intermittently checking the “waiting room.” All sessions will be recorded and uploaded to Canvas.”

Requirements

Regular attendance and work during designated class times, along with participation in class critiques and discussions, is mandatory for all Zoom designated class times. All assignments must be handed in on time. Any assignments handed in late will be graded down a whole grade. All progress JPEGS must be uploaded to Slack as outlined in class assignments. (Note: According to University policy F69-24, “Students attend all meetings of their classes, not only because they are responsible for material discussed therein, but because active participation is frequently essential to insure maximum benefit for all members of the class. Attendance per shall not be used as a crriterion for grading.”)

Homework requirements

Example: Homework is due on Tuesday, but if turned in on Thursday; the best grade a student can receive is a “B”. Any projects handed in after the week they are due will be considered either incomplete, or will receive an “F”

Grading

Grades will be determined by the following percentages:

Class work, including participation in discussions and critiques. - 80%

Homework for entire semester – 20%

Grading breakdown:

4.0 – A	2.2 – 2.7 - C
3.7 – 4.0 – A-	2.0 – 2.2 – C-
