

## Proposed Two-Year Plan MS, Biological Sciences, Physiology

Below is a sample program for an entering graduate student who wishes to complete a MS degree in 2 years. Keep in mind that many graduate students extend their stay at San Jose State University to more than 2 years because they work or have other obligations that necessitate that they proceed more slowly through their coursework. This program presumes that the student has met all of the pre-requisite requirements before beginning graduate classes. The program is for the Masters of Science in Biological Sciences, Concentration in Physiology. Students should consult their major advisor as soon as possible and, at a minimum, each semester thereafter.

<b>Fall 1</b>		<b>Spring 1</b>	
<u>Course</u>	<u>Units</u>	<u>Course</u>	<u>Units</u>
Biology 201	0.5	Biology 201	0.5
Biology 202	3	Biology 230	3
Biology 255P	3	<u>Biology 298</u>	<u>3</u>
<u>Biology 298</u>	<u>1</u>	Total Units	6.5
Total Units	7.5		
<b>Fall 2</b>		<b>Spring 2</b>
