

Dear friends and colleagues,

Our campus community is committed to the principles of inclusiveness, of excellence and of equity. Those under-girding values guide us in our work every day, whatever role we play at SJSU. As we set about to craft today's conference, we thought it would be valuable to create a space to share perspectives on how we can all "Engage for Success". We are excited to provide this opportunity to bring together so many people from the campus and beyond, to talk, to listen, to learn from each other, and to sow the seeds of future collaborations, as we envision ever more effective ways to support our students. We have very much enjoyed planning today's event, and we are so glad you are able to join us.

We know some of you are planning to spend the whole day with us, and some of you will only be able to attend a session or two. Either way, we hope you come away feeling that your time was well spent. We hope you emerge determined to follow up in some way – someone to reach out to or to stay in touch with, something you would like to learn more about, something you would like to share at a future gathering like this one.

In the meantime, thank you for participating – the conversations wouldn't be nearly as rich without you!

Sincerely,

The Engaging for Success conference planning team

This event is co-sponsored by the Center for Faculty Development, the Connie L. Lurie College of Education, the Accessible Education Center, and the Accessible Technology Initiative Instructional Materials Committee at San José State University.
